Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

1. NATURE AND CONTINUANCE OF OPERATIONS

Northern Dynasty Minerals Ltd. (the "Company") is incorporated under the laws of the Province of British Columbia, Canada, and its principal business activity is the exploration of mineral properties. The Company is listed on the Toronto Stock Exchange ("TSX") under the symbol "NDM" and on the NYSE American Exchange ("NYSE American") under the symbol "NAK". The Company's corporate office is located at 1040 West Georgia Street, 14th floor, Vancouver, British Columbia.

The condensed consolidated interim financial statements ("Financial Statements") of the Company as at and for the three months ended March 31, 2022, include financial information for the Company and its subsidiaries (together referred to as the "Group" and individually as "Group entities"). The Company is the ultimate parent. The Group's core mineral property interest is the Pebble Copper-Gold-Molybdenum-Silver-Rhenium Project (the "Pebble Project") located in Alaska, United States of America ("USA" or "US"). All US dollar amounts when presented are denoted "US\$" and expressed in thousands, unless otherwise stated.

The Group is in the process of exploring and developing the Pebble Project and has not yet determined whether the Pebble Project contains mineral reserves that are economically recoverable. The Group's continuing operations and the underlying value and recoverability of the amounts shown for the Group's mineral property interests is entirely dependent upon the existence of economically recoverable mineral reserves; the ability of the Group to obtain financing to complete the exploration and development of the Pebble Project; the Group obtaining the necessary permits to mine; and future profitable production or proceeds from the disposition of the Pebble Project.

As of March 31, 2022, the Group had \$17,925 (December 31 2021 - \$22,291) in cash and cash equivalents for its operating requirements and working capital of \$17,296 (December 31, 2021 - \$21,734). These Financial Statements have been prepared on the basis of a going concern, which assumes that the Group will be able to raise sufficient funds to continue its exploration and development activities and satisfy its obligations as they come due. During the three months ended March 31, 2022 and 2021, the Group incurred a net loss of \$4,462 and \$9,519, respectively, and had a deficit of \$655,982 as of March 31, 2022. The Group has prioritized the allocation of its financial resources to meet key corporate and Pebble Project expenditure requirements in the near term, including the funding of the appeal of the Record of Decision (the "ROD") (discussed below) and class action litigation (note 13(a)). Additional financing will be needed to progress any material expenditures at the Pebble Project and for working capital. Additional financing may include any of or a combination of debt, equity and/or contributions from possible new Pebble Project participants. The Group currently has an At-the-Market Offering Agreement ("ATM Agreement") in place, whereby the Group as at March 31, 2022, at its sole discretion, can sell through the agent, up to US\$13.8 million in common shares during the term of the ATM Agreement. There can be no assurances that the Group will be successful in obtaining additional financing when required. If the Group is unable to raise the necessary capital resources and generate sufficient cash flows to meet obligations as they come due, the Group may, at some point, consider reducing or curtailing its operations. As such, there is material uncertainty that raises substantial doubt about the Group's ability to continue as a going concern.

These Financial Statements do not reflect adjustments to the carrying values and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern, and such adjustments could be material.

The Group, through the Pebble Limited Partnership ("Pebble Partnership"), initiated federal and state permitting for the Pebble Project under the National Environmental Protection Act ("NEPA") by filing documentation for a Clean Water Act ("CWA") 404 permit with the US Army Corps of Engineers ("USACE") in December 2017. The USACE published a draft Environmental Impact Statement ("EIS") in February 2019 and completed a 120-day public comment period thereon on July 2, 2019. In late July 2019, the US Environmental Protection Agency ("EPA") withdrew the determination initiated under Section 404(c) of the CWA in 2014 for the waters of Bristol Bay ("Proposed Determination"), which attempted to pre-emptively veto the Pebble Project before it received an

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

objective, scientific regulatory review under NEPA. On July 24, 2020, the USACE published the final EIS. On November 25, 2020, the USACE issued a ROD rejecting the Pebble Partnership's permit application, finding concerns with the proposed compensatory mitigation plan and determining the project would be contrary to the public interest. The ROD rejected the compensatory mitigation plan as "noncompliant" and determined the project would cause "significant degradation" and was contrary to the public interest. Based on this finding, the USACE rejected Pebble Partnership's permit application under the CWA. On January 19, 2021, the Pebble Partnership submitted its request for appeal of the ROD with the USACE (the "RFA"). On February 24, 2021, the USACE notified the Pebble Partnership that the RFA is "complete and meets the criteria for appeal" and assigned a review officer ("RO") to oversee the administrative appeal process at that time and has since assigned a new RO. While federal regulations suggest the appeal should conclude within 90 days, and no case extend beyond one year, the USACE also indicated that due to the complexity of issues and volume of materials associated with the Pebble Project case, the review will take additional time. In June 2021, the USACE completed the 'administrative record' for the appeal and provided a copy to the Pebble Partnership, following which the Pebble Partnership and its legal counsel reviewed the voluminous record for completeness and relevance to the USACE's permitting decision, and its sufficiency to support a fair, transparent and efficient review. An appeal conference is currently scheduled for the summer of 2022. The timing for the final decision on the appeal remains uncertain.

On October 29, 2021, the court granted the EPA's motion for remand, and vacated the EPA's 2019 withdrawal of the Proposed Determination decision, thus reinstating the Proposed Determination. The court declined to impose a schedule on the EPA's proceedings on remand. The EPA subsequently extended the deadline either to withdraw the Proposed Determination or to prepare a Recommended Determination regarding the Pebble Project until May 31, 2022. The Group will continue to monitor these developments closely to determine the possible impacts to the project and permitting process, as it remains the Group's position that the withdrawal of the preemptive veto by the EPA was sound and appropriate.

2. SIGNIFICANT ACCOUNTING POLICIES

(a) *Statement of Compliance*

These Financial Statements have been prepared in accordance with IAS 34, *Interim Financial Reporting*, as issued by the International Accounting Standards Board ("IASB") and interpretations issued by the IFRS Interpretations Committee ("IFRIC"s). They do not include all of the information required by IFRS for complete annual financial statements, and should be read in conjunction with the Group's consolidated financial statements as at and for the year ended December 31, 2021 ("2021 annual financial statements").

These Financial Statements were authorized for issue by the Audit and Risk Committee on May 11, 2022.

(b) *Use of Judgements and Estimates*

In preparing these Financial Statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

There was no change in the use of significant estimates and judgments during the current period as compared to those described in Note 2 in the 2021 annual financial statements, two of which are discussed below:

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

Critical accounting judgments

Mineral Property Interest

The Group used judgement in concluding that no impairment indicators exist in relation to the Pebble Project, notwithstanding the receipt of the ROD denial of the permit for the Pebble Project, which would be considered an indicator under IFRS 6, *Exploration for and Evaluation of Mineral Resources*, for testing for impairment. Key to the Group's judgement conclusion is that it has submitted an administrative appeal with the USACE, which is currently running its course, the Group will be pursuing other options available to it, and that as at March 31, 2022, and the date the Financial Statements were authorized for issuance, the Company's market capitalization exceeded the carrying value of the Pebble Project and the Group's net asset value.

Going Concern

The Group has employed judgement that going concern was an appropriate basis for the preparation of the Financial Statements, as the Group considered existing financial resources in determining that such financial resources are able to meet key corporate and Pebble Project expenditure requirements for at least the next twelve months (note 1).

(c) Amendment Adopted by the Group

Effective January 1, 2022, the Group adopted amendments to IAS 16, *Property Plant and Equipment*, which require the net proceeds from selling any items produced while bringing an item of property, plant and equipment ("PPE") to the location and condition necessary for it to be capable of operating in the manner intended by management together with the cost of producing these items, to be recognized in profit and loss.

The adoption of these amendments did not impact the Financial Statements.

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

3. MINERAL PROPERTY, PLANT AND EQUIPMENT

The Group's exploration and evaluation assets are comprised of the following:

<i>Three months ended March 31, 2022</i>		Mineral Property interest ¹	Plant and equipment ²	Total
Cost				
Balance December 31, 2021 and Ending balance	\$	112,541	\$ 3,029	\$ 115,570
Accumulated depreciation				
Balance December 31, 2021		-	(2,454)	(2,454)
Depreciation charge for the period ^{3,4}		-	(60)	(60)
Ending balance		-	(2,514)	(2,514)
Foreign currency translation difference				
Balance December 31, 2021		21,079	144	21,223
Movement for period		(1,415)	(6)	(1,421)
Ending balance		19,664	138	19,802
Net carrying value - December 31, 2021	\$	133,620	\$ 719	\$ 134,339
Net carrying value - March 31, 2022	\$	132,205	\$ 653	\$ 132,858

Notes to tables:

- Comprises the Pebble Project, a contiguous block of 1,840 mineral claims covering approximately 274 square miles located in southwest Alaska, 17 miles (30 kilometers) from the villages of Iliamna and Newhalen, and approximately 200 miles (320 kilometers) southwest of the city of Anchorage.
- Includes Right-of-use assets ("ROU Assets"), which relate to the use of office space, a copier, hangers, yard storage and one vehicle, which was disposed of in February 2021. The following comprises ROU Assets:

<i>Three months ended March 31, 2022</i>		Land and Buildings	Equipment	Total
Cost				
Balance December 31, 2021 and Ending balance	\$	1,631	\$ 32	\$ 1,663
Accumulated depreciation				
Balance December 31, 2021		(947)	(20)	(967)
Depreciation charge for the period ^{3,4}		(34)	(2)	(36)
Ending balance		(981)	(22)	(1,003)
Foreign currency translation difference				
Balance December 31, 2021		(76)	(1)	(77)
Movement for period		(6)	-	(6)
Ending balance		(82)	(1)	(83)
Net carrying value - December 31, 2021	\$	608	\$ 11	\$ 619
Net carrying value - March 31, 2022	\$	568	\$ 9	\$ 577

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

- For the three months ended March 31, 2021, total depreciation was \$90 of which ROU Asset depreciation was \$66.
- ROU Asset depreciation of \$25 (2021 – \$55) is included in general and administrative expenses (note 9(b)) for the three months ended March 31, 2022. The remainder is included in exploration and evaluation expenses.

4. AMOUNTS RECEIVABLE AND PREPAID EXPENSES

	March 31 2022	December 31 2021
Sales tax receivable	\$ 82	\$ 79
Deferred At-the-Market Offering costs ¹	352	352
Interest, refundable deposits and other receivables	52	85
Prepaid expenses ²	930	1,351
Total	\$ 1,416	\$ 1,867

Notes

- These costs are allocated to equity based on the dollar amount issued as a percentage of the total amount available under the ATM Agreement.
- Includes prepaid insurance, which is amortized over the insurance term.

5. CASH AND CASH EQUIVALENTS AND RESTRICTED CASH

(a) Cash and cash equivalents

The Group's cash and cash equivalents at March 31, 2022 and December 31, 2021, consisted of cash on hand and was invested in business and savings accounts.

(b) Restricted cash

The Group has cash deposited with a United States financial institution that has been pledged as collateral to the surety provider for a US\$2,000 surety bond that was placed with the Alaskan regulatory authorities for a performance guarantee related to any potential reclamation liability as a condition of the Miscellaneous Land Use Permit granted to the Pebble Partnership for its ongoing activities on the Pebble Project. The cash deposit will be released once any reclamation work required has been performed and assessed by the Alaskan regulatory authorities. The cash is invested in a money market fund. For the three months ended March 31, 2022 and 2021, nominal income was recognized, which was re-invested.

6. CAPITAL AND RESERVES

(a) Authorized Share Capital

At March 31, 2022 and 2021, authorized share capital consisted of an unlimited number of common shares ("shares") with no par value. At March 31, 2022, 529,779,388 (2021 – 512,790,198) shares were issued and fully paid.

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

(b) Share Purchase Warrants and Options not Issued under the Group's Incentive Plan

The following reconciles outstanding warrants and non-employee options (options that were not issued under the Group's incentive plan (see below)), each exercisable to acquire one share, for the three months ended March 31, 2022 and 2021 respectively:

Continuity	Cannon Point options ¹	Warrants ²	Total
Balance January 1, 2021	211,500	17,713,265	17,924,765
Exercised	(79,900)	(614,667)	(694,567)
Balance March 31, 2021	131,600	17,098,598	17,230,198
Exercised	(37,600)	(13,703,785)	(13,741,385)
Expired	-	(3,394,813)	(3,394,813)
Balance December 31, 2021 and March 31, 2022	94,000	-	94,000

Weighted averages per option/warrant			
	Cannon Point options	Warrants	Total
March 31, 2022			
Exercise price	\$ 0.36	-	\$ 0.36
Remaining life in years	1.50	-	1.50
December 31, 2021			
Exercise price	\$ 0.36	-	\$ 0.36
Remaining life in years	1.74	-	1.74

Notes to tables:

1. The Group issued options in exchange for those which were outstanding in Cannon Point Resources Ltd. ("Cannon Point") on the acquisition of the company in October 2015.
2. Warrants were issued pursuant to the June 2016 prospectus financing, July 2016 private placement and the 2019 non-revolving term loan credit facility agreement.

(c) Share Purchase Option Compensation Plan

The following reconciles the Group's share purchase options ("options") issued and outstanding pursuant to the Group's incentive plan for the three months ended March 31, 2022 and 2021:

Continuity of options	Number of options	Weighted average exercise price (\$/option)
Balance January 1, 2021	28,481,500	1.20
Exercised	(3,049,000)	0.52
Balance March 31, 2021	25,432,500	1.29
Exercised	(2,035,000)	0.49
Expired	(2,572,000)	0.61
Balance December 31, 2021 and March 31, 2022	20,825,500	1.45

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

For the three months ended March 31, 2022, the Group recognized \$nil (2021 - \$1,322) in share based compensation ("SBC") as all options outstanding were fully vested.

The following table summarizes information on options outstanding as at the reported dates:

Exercise prices (\$)	March 31, 2022			December 31, 2021		
	Number of options outstanding	Number of options exercisable	Weighted Average Remaining contractual life (years)	Number of options outstanding	Number of options exercisable	Weighted Average Remaining contractual life (years)
0.76	3,300,000	3,300,000	1.36	3,300,000	3,300,000	1.61
0.99	6,368,500	6,368,500	2.50	6,368,500	6,368,500	2.74
1.75	4,386,000	4,386,000	0.32	4,386,000	4,386,000	0.57
2.01	6,696,000	6,696,000	3.30	6,696,000	6,696,000	3.55
2.34	75,000	75,000	1.33	75,000	75,000	1.58
Total	20,825,500	20,825,500		20,825,500	20,825,500	

The weighted average contractual life for options outstanding, which were all exercisable, was 2.11 (December 31, 2021 - 2.36) years per option. The weighted average exercise price for exercisable options as at March 31, 2022 was \$1.45 (December 31, 2021 - \$1.45) per option.

(d) *Deferred Share Units ("DSUs")*

The following reconciles DSUs outstanding for the three months ended March 31, 2022 and 2021:

	Number of DSUs	Weighted average fair value (\$/DSU)
Continuity of DSUs		
Balance January 1, 2021 and March 31, 2021	458,129	0.69
Granted	19,582	0.60
Balance December 31, 2021	477,711	0.69
Granted ¹	13,972	0.45
Balance March 31, 2022	491,683	0.68

Note

1. On grant date, the Group recognized share-based compensation of \$6 in the statement of loss, based on the aggregate market value of shares on grant date, with a corresponding increase in the equity-settled share payment reserve in equity.

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

(e) Foreign Currency Translation Reserve

Continuity

Balance January 1, 2021	\$ 29,661
Loss on translation of foreign subsidiaries	(1,814)
Balance March 31, 2021	27,847
Gain on translation of foreign subsidiaries	911
Balance December 31, 2021	28,758
Loss on translation of foreign subsidiaries	(1,425)
Balance March 31, 2022	\$ 27,333

The foreign currency translation reserve represents accumulated exchange differences arising on the translation, into the Group's presentation currency (the Canadian dollar), of the results of operations and net assets of the Group's subsidiaries with a US dollar functional currency.

7. RELATED PARTY BALANCES AND TRANSACTIONS

The components of transactions to related parties is as follows:

	March 31 2022	December 31 2021
Payables to related parties		
Key management personnel ("KMP")(a)	\$ 62	\$ 35
Hunter Dickinson Services Inc. ("HDSI")(b)	446	341
Total payables to related parties	\$ 508	\$ 376

Balances and transactions between the Company and its subsidiaries, which are related parties of the Company, have been eliminated on consolidation. Details between the Group and other related parties are disclosed below.

(a) Transactions and Balances with Key Management Personnel

The aggregate value of transactions with KMP, being the Group's directors, including Chief Executive Officer ("CEO"), Chief Financial Officer ("CFO"), Company Secretary and General Counsel, Executive Vice President ("EVP")s, Environment and Sustainability and Corporate Development, Vice President ("VP")s, Engineering, Investor Relations and Public Affairs (until August 31, 2021), and Pebble Partnership ("PLP") senior management including the PLP CEO and Chair of Pebble Mines Corp ("PMC Chair"), Senior VP ("SVP"), Corporate Affairs (until May 21, 2021), SVP Engineering (until February 28, 2021), Senior VP, and Chief of Staff (until February 19, 2021), was as follows for the three months ended March 31, 2022 and 2021:

Transaction	2022	2021
Compensation		
Amounts paid and payable to HDSI for services of KMP employed by HDSI ¹	\$ 654	\$ 748
Amounts paid and payable to KMP ²	461	1,060
	1,115	1,808
Share-based compensation ³	6	847
Total compensation	\$ 1,121	\$ 2,655

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

Notes to table:

1. The Group's CEO, CFO, Board Chair and senior management, other than disclosed in note 2 below, are employed by the Group through HDSI (refer (b)).
2. Represents short-term employee benefits, including director's fees paid to the Group's independent directors, and salaries paid and payable to the PLP senior management noted above. The SVP Engineering was employed by the Group through a wholly-owned US subsidiary of HDSI ("HDUS") until the end of February 2021. The Group reimbursed HDUS for costs incurred.
3. For the three months ended March 31, 2022, SBC relates to DSUs issued (note 6(d)). In the comparative period, SBC relates to vesting of prior year option grants.

(b) Transactions and Balances with other Related Parties

HDSI is a private company that provides geological, engineering, environmental, corporate development, financial, administrative and management services to the Group and its subsidiaries at annually set rates pursuant to a management services agreement. The annually set rates also include a component of overhead costs such as office rent, information technology services and general administrative support services. HDSI also incurs third party costs on behalf of the Group, which are reimbursed by the Group at cost. Several directors and other key management personnel of HDSI, who are close business associates, are also key management personnel of the Group.

For the three months ended March 31, 2022 and 2021, transactions with HDSI were as follows:

Transactions	2022	2021
Services rendered by HDSI:		
Technical ¹		
Engineering	\$ 113	\$ 230
Environmental	140	104
Socioeconomic	-	122
Other technical services	20	27
	273	483
General and administrative		
Management, consulting, corporate communications, secretarial, financial and administration	558	732
Shareholder communication	190	190
	748	922
Total for services rendered	1,021	1,405
Reimbursement of third party expenses		
Conferences and travel	41	10
Insurance	71	68
Office supplies and information technology ²	141	106
Total reimbursed	253	184
Total	\$ 1,274	\$ 1,589

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

Notes to table

1. Included in exploration and evaluation expenses.
2. Includes payments made for the use of offices and shared space of \$45 for the three months ended March 31, 2021 (2021 - \$2). In April 2021, the Company signed an office use agreement effective May 1, 2021, for a five-year term ending April 29, 2026. As of March 31, 2022, the remaining undiscounted commitment was \$408 (note 13(e)).

Pursuant to an addendum to the management services agreement between HDSI and the Company, following a change of control, the Company is subject to termination payments if the management services agreement is terminated. The Company will be required to pay HDSI \$2,800 and an aggregate amount equal to six months of annual salaries payable to certain individual service providers under the management services agreement and their respective employment agreements with HDSI.

8. TRADE AND OTHER PAYABLES

	March 31 2022	December 31 2021
Current liabilities		
Falling due within the year		
Trade	\$ 1,411	\$ 1,922
Lease liabilities ²	126	126
Total	\$ 1,537	\$ 2,048
	March 31 2022	December 31 2021
Non-current liabilities		
Trade ¹	\$ 795	\$ 804
Lease liabilities ²	524	561
Total	\$ 1,319	\$ 1,365

Notes to tables:

1. Includes fees due to legal counsel of US\$635 payable on completion of a partnering transaction.
2. Lease liabilities relate to lease of offices, a copier and yard storage, which have remaining lease terms of 9 to 98 months and interest rates of 9.5% - 12% over the term of the leases. During the three months ended March 31, 2022, the Group recognized \$17 (2021 - \$22) in interest expense on lease liabilities.

The following summarizes lease liabilities for the reporting periods indicated:

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

Lease liabilities	March 31 2022	December 31 2021
Beginning balance	\$ 687	\$ 916
Interest expense	17	67
Effect of modification to lease term	-	(284)
Lease payments	(47)	(267)
Lease recognition	-	268
Lease settlement	-	(5)
Foreign currency translation difference	(7)	(8)
Ending balance	650	687
Current portion	126	126
Non-current portion	524	561
Total	\$ 650	\$ 687

The following table provides the schedule of undiscounted lease liabilities as at March 31, 2022:

	Total
Less than one year	\$ 186
One to five years	518
Later than 5 years	165
Total undiscounted lease liabilities	\$ 869

The Group had short-term lease commitments of less than a year relating to a property lease totaling \$50 as of January 1, 2022. During the three months ended March 31, 2022, the Group incurred short-term lease commitments of \$nil (2021 - \$nil), and expensed \$38 (2021 - \$45).

9. EXPLORATION AND EVALUATION AND GENERAL AND ADMINISTRATIVE EXPENSES

(a) Exploration and Evaluation Expenses ("E&E")

For the three months ended March 31, 2022 and 2021, E&E consisted of the following:

E&E	Three months	
	2022	2021
Engineering	\$ 948	\$ 1,109
Environmental	537	829
Site activities	282	466
Socio-economic	517	827
Transportation	-	15
Other activities and travel	17	40
Total	\$ 2,301	\$ 3,286

(b) General and Administrative Expenses ("G&A")

For the three months ended March 31, 2022 and 2021, G&A consisted of the following:

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

G&A	Three months	
	2022	2021
Conference and travel	\$ 50	\$ 26
Consulting	149	279
Depreciation of right-of-use assets	25	55
Insurance	525	269
Office costs, including information technology	175	204
Management and administration	755	1,189
Shareholder communication	219	230
Trust and filing	195	210
Total	\$ 2,093	\$ 2,462

10. EMPLOYMENT COSTS

During the three months ended March 31, 2022, the Group recorded the following:

	Three months	
	2022	2021
Exploration and evaluation		
Salaries and benefits	\$ 577	\$ 953
Amounts paid for services by HDSI personnel (note 7(b))	274	382
	851	1,335
General and administrative		
Salaries and benefits	359	404
Amounts paid for services by HDSI personnel (note 7(b))	622	753
	981	1,157
Share-based payments	6	1,322
	\$ 1,838	\$ 3,814

11. BASIC AND DILUTED LOSS PER SHARE

The calculation of basic and diluted loss per share for the three months ended March 31, 2022 and 2021 was based on the following:

	2022	2021
Loss attributable to shareholders	\$ 4,462	\$ 9,519
Weighted average number of shares outstanding (000s)	529,779	511,259

For the three months ended March 31, 2022 and 2021, basic and diluted loss per share does not include the effect of employee share purchase options outstanding (2022 - 20,825,500, 2021 - 25,432,500), non-employee share purchase options and warrants (2022 - 94,000, 2021 - 17,230,198) and DSUs (2022 - 491,683, 2021 - 458,129), as they were anti-dilutive.

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

12. FINANCIAL RISK MANAGEMENT

The Group is exposed in varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

(a) Credit Risk

Credit risk is the risk of potential loss to the Group if a counterparty to a financial instrument fails to meet its contractual obligations. The Group's credit risk is primarily attributable to its liquid financial assets, including cash and cash equivalents, restricted cash and amounts receivable. The Group limits the exposure to credit risk by only investing its cash and cash equivalents and restricted cash with high-credit quality financial institutions in business and saving accounts, guaranteed investment certificates, in government treasury bills, low risk corporate bonds and money market funds which are available on demand by the Group when required. Amounts receivable in the table below exclude receivable balances with government agencies (note 4). The Group's maximum exposure was as follows:

Exposure	March 31 2022	December 31 2021
Interest, refundable deposits and other receivables	\$ 52	\$ 85
Restricted cash	777	785
Cash and cash equivalents	17,925	22,291
Total exposure	\$ 18,754	\$ 23,161

(b) Liquidity Risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations when they become due. The Group ensures, as far as reasonably possible, it will have sufficient capital in order to meet short to medium term business requirements, after taking into account cash flows from operations and the Group's holdings of cash and cash equivalents and restricted cash, where applicable. However, the Group has noted material uncertainty that raises substantial doubt about the Group's ability to continue as a going concern notwithstanding the Group having positive working capital (note 1) as demands may exceed existing resources, and that it has been successful in the past in raising funds when needed. The Group's cash and cash equivalents at the reporting date were invested in business and savings accounts (note 5(a)).

The Group's financial liabilities are comprised of current trade and other payables (note 8) and payables to related parties (note 7), which are due for payment within 12 months from the reporting date, and non-current trade payables, which are due for payment more than 12 months from the reporting date. The carrying amounts of the Group's financial liabilities represent the Group's contractual obligations.

(c) Foreign Exchange Risk

The Company is subject to both currency transaction risk and currency translation risk: the Pebble Partnership, Pebble Services Inc. and U5 Resources Inc. have the US dollar as functional currency, and certain of the Company's corporate expenses are incurred in US dollars. The operating results and financial position of the Group are reported in Canadian dollars in these Financial Statements. As a result, the fluctuation of the US dollar in relation to the Canadian dollar will have an impact upon the losses incurred by the Group as well as the value of the Group's assets and the amount of shareholders' equity. The Group has not entered into any agreements or purchased any instruments to hedge possible currency risks.

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

The exposure of the Group's US dollar-denominated financial assets and liabilities to foreign exchange risk was as follows:

	March 31 2022	December 31 2021
Financial assets:		
Amounts receivable	\$ 155	\$ 168
Cash and cash equivalents and restricted cash	3,526	5,433
	3,681	5,601
Financial liabilities:		
Non-current trade payables	(1,319)	(1,365)
Current trade and other payables	(1,066)	(1,670)
Payables to related parties	(134)	(190)
	(2,519)	(3,225)
Net financial assets exposed to foreign currency risk	\$ 1,162	\$ 2,376

Based on the above net exposures and assuming that all other variables remain constant, a 10% change in the value of the Canadian dollar relative to the US dollar would result in a gain or loss of \$116 (December 31, 2021 - \$238) in the reported period. This sensitivity analysis includes only outstanding foreign currency denominated monetary items.

(d) *Interest Rate Risk*

The Group is subject to interest rate cash flow risk with respect to its investments in cash and cash equivalents. The Group's policy is to invest cash at fixed rates of interest and cash reserves are to be maintained in cash and cash equivalents or short-term low risk investments in order to maintain liquidity, while achieving a satisfactory return for shareholders. Fluctuations in interest rates when cash and cash equivalents mature impact interest income earned.

Assuming that all other variables remain constant, a 100 basis points change representing a 1% increase or decrease in interest rates would have resulted in a decrease or increase in loss of \$50 (2021 - \$324).

(e) *Capital Management*

The Group's policy is to maintain a strong capital base to maintain investor and creditor confidence and to sustain future development of the business. The capital structure of the Group consists of equity, comprising share capital and reserves, net of accumulated deficit. There were no changes in the Group's approach to capital management during the period. The Group is not subject to any externally imposed capital requirements.

(f) *Fair Value*

The fair value of the Group's financial assets and liabilities approximates the carrying amount.

13. COMMITMENTS AND CONTINGENCIES

(a) *Legal Proceedings*

Class Action Litigation Relating to the USACE's Record of Decision

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

On December 4 and December 17, 2020, separate putative shareholder class action lawsuits were filed against the Company and certain of its current and former officers and directors in the U.S. District Court for the Eastern District of New York (Brooklyn) regarding the drop in the price of the Company's stock following the ROD by the USACE regarding the Pebble Project. These cases are captioned *Darish v. Northern Dynasty Minerals Ltd. et al.*, Case No. 1:20-cv-05917-ENV-RLM, and *Hymowitz v. Northern Dynasty Minerals Ltd. et al.*, Case No. 1:20-cv-06126-PKC-RLM. Each of the complaints was filed on behalf of a purported class of investors who purchased shares of the Company's stock from December 21, 2017, through November 25, 2020, the date the USACE announced its decision, and seeks damages allegedly caused by violations of the federal securities laws. On March 17, 2021, the two cases were consolidated and a lead plaintiff and counsel were appointed. A consolidated and amended complaint was filed in June 2021, naming the Company, the Company's CEO and the Pebble Partnership's former CEO as defendants. The Company intends to defend itself vigorously and has filed a motion to dismiss the complaint on behalf of all defendants.

On December 3, 2020, a putative shareholder class action lawsuit was filed against the Company, certain of its current and former officers and directors, and one of its underwriters in the Supreme Court of British Columbia regarding the decrease in the price of the Company's stock following the USACE's November 25, 2020, decision regarding the Pebble Project. The case is captioned *Haddad v. Northern Dynasty Minerals Ltd. et al.*, Case No. VLC-S-S-2012849. The claim was filed on behalf of a purported class of investors, wherever they may reside, who acquired common shares of the Company's stock between December 21, 2017, and November 25, 2020, and seeks damages for (i) alleged misrepresentations in the Company's primary market offering documents and continuous disclosure documents, and (ii) its allegedly oppressive conduct. The Company has been served the claim and intends to defend itself vigorously. The underwriter has asserted contractual rights of indemnification against the Company for any loss that the underwriter may incur in connection with the lawsuit.

On February 17, 2021, a putative shareholder class action lawsuit was filed against the Company, certain of its current and former officers and directors, and certain of its underwriters in the Supreme Court of British Columbia regarding the decrease in the price of the Company's stock following (i) the USACE's August 24, 2020 announcement that the Pebble Project could not be permitted as proposed, and (ii) the USACE's November 25, 2020 decision regarding the Pebble Project. The case is captioned *Woo v. Northern Dynasty Minerals Ltd. et al.*, Case No. VLC-S-S-211530. The claim was filed on behalf of a purported class of investors, wherever they may reside, who purchased securities of the Company between June 25, 2020 and November 25, 2020, and seeks damages for (i) alleged misrepresentations in the Company's primary market offering documents and continuous disclosure documents, (ii) allegedly oppressive conduct, (iii) alleged unjust enrichment, and (iv) negligence. The Company has been served and intends to defend itself vigorously. The underwriters have asserted contractual rights of indemnification against the Company for any loss that they may incur in connection with the lawsuit.

On March 5, 2021, a putative shareholder class action lawsuit was filed against the Company, certain of its current and former officers and directors, and certain of its underwriters in the Ontario Superior Court of Justice regarding the decrease in the price of the Company's stock following the USACE's November 25, 2020 decision regarding the Pebble Project. The case is captioned *Pirzada v. Northern Dynasty Minerals Ltd. et al.*, Case No. CV-21-00658284-00CP. The claim was filed on behalf of a purported class of investors, wherever they may reside, who acquired securities of the Company between June 25, 2020 and November 25, 2020, and seeks damages for (i) alleged misrepresentations in the Company's primary market offering documents and continuous disclosure documents, (ii) allegedly oppressive conduct, and (iii) alleged negligence. On March 30, 2022, the plaintiff made a motion to discontinue the claim without costs and the court granted the discontinuance in April 2022.

Given the nature of the claims, it is not currently possible for the Company to predict the outcome nor practical to determine their possible financial effect.

Northern Dynasty Minerals Ltd.

Notes to the Condensed Consolidated Interim Financial Statements

For the three months ended March 31, 2022 and 2021

(Unaudited - Expressed in thousands of Canadian Dollars, unless otherwise stated, except per share, option, warrant or DSU)

Grand Jury Subpoena

On February 5, 2021, the Company announced that the Pebble Partnership and its former CEO, have each been served with a subpoena issued by the United States Attorney's Office for the District of Alaska to produce documents in connection with a grand jury investigation apparently involving previously disclosed recordings of private conversations regarding the Pebble Project. The Company is not aware of any civil or criminal charges having been filed against any entity or individual in this matter. The Company also self-reported this matter to the US Securities and Exchange Commission ("SEC"), and there is a related informal inquiry being conducted by the enforcement staff of the SEC's San Francisco Regional Office. The Company and the Pebble Partnership are cooperating with each of these the investigations.

Indemnification Obligations

The Company is subject to certain indemnification obligations to both present and former officers and directors, including the Pebble Partnership's former CEO, in respect to the legal proceedings described above. These indemnification obligations will be subject to limitations prescribed by law and the articles of the Company, and may also be subject to contractual limitations.

(b) Short-term Lease Commitments

As of March 31, 2022, the Group has a short-term lease commitment of \$12 with a fixed monthly payment over the remaining term.

(c) Pipeline Right-of-Way Bond Commitment

The Group has a bond of US\$300 with the Alaskan regulatory authorities for a performance guarantee related to any potential reclamation liability as a condition for a pipeline right-of-way to a subsidiary of the Pebble Partnership, the Pebble Pipeline Corporation. The Group is liable to the surety provider for any funds drawn by the Alaskan regulatory authorities.

(d) Pebble Performance Dividend Commitment

The Group has a future commitment beginning at the outset of project construction at the Pebble Project to distribute cash generated from a 3% net profits royalty interest in the Pebble Project to adult residents of Bristol Bay villages that have subscribed as participants, with a guaranteed minimum aggregate annual payment of US\$3,000 each year the Pebble mine operates.

(e) Office Use Commitment

The Company has an office use agreement with HDSI (note 7(b)) ending April 29, 2026, for a total remaining undiscounted commitment of \$408. This commitment is a flow through cost at market rates. The following table summarizes the commitment schedule:

	Total
Less than one year	\$ 95
One to five years	313
Total	\$ 408

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

1.1 Date

This Management's Discussion and Analysis ("**MD&A**") should be read in conjunction with the unaudited condensed consolidated interim financial statements (the "**Financial Statements**") of Northern Dynasty Minerals Ltd. ("**Northern Dynasty**" or the "**Company**") for the three months ended March 31, 2022, and the Company's audited consolidated financial statements for the year ended December 31, 2021 (the "**2021 Financial Statements**") and the annual MD&A for the same period (the "**2021 Annual MD&A**"), as publicly filed under the Company's profile on SEDAR at www.sedar.com.

The Company reports in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("**IASB**") and interpretations of the IFRS Interpretations Committee (together, "**IFRS**"). The following disclosure and associated Interim Financial Statements are presented in accordance with IFRS. This MD&A is prepared as of May 13, 2022.

All dollar amounts herein are expressed in Canadian dollars, unless otherwise specified.

This MD&A contains certain forward-looking information and forward-looking statements within the meaning of applicable Canadian securities laws and forward-looking statements within the meaning of the United States *Private Securities Litigation Reform Act of 1995*. Forward-looking statements describe our future plans, strategies, expectations and objectives, and are generally, but not always, identifiable by use of the words "may", "will", "should", "continue", "expect", "anticipate", "estimate", "believe", "intend", "plan" or "project" or the negative of these words or other variations on these words or comparable terminology.

Forward-looking statements contained or incorporated by reference into this MD&A include, without limitation, statements regarding:

- our expectations regarding the potential for securing the necessary permitting of a mine at the Pebble Project and our ability to establish that such a permitted mine can be economically developed;
- the success of our appeal of the Record of Decision of the United States Army Corps of Engineers denying the issuance of certain permits required for the Pebble Project, and the timing of a decision on this appeal;
- our ability to successfully obtain federal and state permits required for the Pebble Project, including under the Clean Water Act, the National Environmental Policy Act, and relevant legislation;
- the outcome of the US government investigations involving the Company;
- our ability to successfully defend against purported class action law suits that have been commenced against the Company;
- our plan of operations, including our plans to carry out and finance exploration and development activities;
- our ability to raise capital for the exploration, permitting and development activities and meet our working capital requirements;
- our expected financial performance in future periods;
- our expectations regarding the exploration and development potential of the Pebble Project;
- the outcome of the legal proceedings in which we are engaged;
- the contribution of the Pebble Project to the United States federal, state and regional economies;
- the uncertainties with respect to the effects of COVID-19;
- uncertainties related to the conflict in Ukraine; and
- factors relating to our investment decisions.

Management's Discussion And Analysis
Three months ended March 31, 2022

Such forward-looking statements or information related to the Preliminary Economic Assessment include statements regarding (i) the mine plan for the Pebble Project, the financial results of the 2021 PEA, including net present value and internal rates of return, and the ability of the Pebble Partnership to secure the financing to proceed with the development of the Pebble Project, including any stream financing and infrastructure outsourcing, (ii) the social integration of the Pebble Project into the Bristol Bay region and benefits for Alaska, (iii) the political and public support for the permitting process, (iv) the ability to successfully appeal the negative Record of Decision and secure the issuance of a positive Record of Decision by the U.S. Army Corps of Engineers and the ability of the Pebble Project to secure all required federal and state permits, (v) the right-sizing and de-risking of the Pebble Project, including any determination to pursue any of the expansion scenarios for the Pebble Project or to incorporate a gold plant, (vi) the design and operating parameters for the Pebble Project mine plan, including projected capital and operating costs, (vii) exploration potential of the Pebble Project, (viii) future demand for copper and gold and the metals prices assumed for the financial projections including the 2021 PEA, (ix) the potential addition of partners in the Pebble Project, and (x) the ability and timetable of NDM to develop the Pebble Project and become a leading copper, gold and molybdenum producer. Although NDM believes the expectations expressed in these forward-looking statements are based on reasonable assumptions, such statements should not be in any way be construed as guarantees that the Pebble Project will secure all required government permits, establish the commercial feasibility of the Pebble Project, achieve the required financing or develop the Pebble Project. Such forward-looking statements or information related to this Preliminary Economic Assessment include but are not limited to statements or information with respect to the mined and processed material estimates; the internal rate of return; the annual production; the net present value; the life of mine; the capital costs, operating costs estimated for each of the Proposed Project and three Expansion Scenarios for the Pebble Project; and other costs and payments for the proposed infrastructure for the Pebble Project (including how, when, where and by whom such infrastructure will be constructed or developed); projected metallurgical recoveries; plans for further development, and securing the required permits and licenses for further studies to consider expansion of the operation; and market price of precious and base metals; or other statements that are not statement of fact.

The 2021 PEA is preliminary in nature, and includes Inferred mineral resources that are considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves. There is no assurance that the 2021 PEA will be realized. Mineral Resources that are not mineral reserves do not have demonstrated economic viability, and there is no assurance that the Pebble Project mineral resources will ever be upgraded to reserves. The 2021 PEA assumes that the Proposed Project will ultimately be able to obtain the required permits from the USACE and state of Alaska authorities to enable development of the Proposed Project. Neither the 2021 PEA, nor the mineral resource estimates on which the 2021 PEA is based, have been adjusted for any risk that the Pebble Partnership may not be able to successfully appeal the record of decision issued by the USACE on November 25, 2020 denying the granting of the required permit under the Clean Water Act.

Forward-looking information is based on the reasonable assumptions, estimates, analysis and opinions of management made in light of its experience and its perception of trends, current conditions and expected developments, as well as other factors that management believes to be relevant and reasonable in the circumstances at the date that such statements are made, but which may prove to be incorrect. We believe that the assumptions and expectations reflected in such forward-looking information are reasonable.

Key assumptions upon which the Company's forward-looking information are based include:

- that our appeal of the Record of Decision with the United States Army Corps of Engineers will be successful;
- that we will ultimately be able to demonstrate that a mine at the Pebble Project can be developed and operated in an environmentally sound and socially responsible manner, meeting all relevant federal, state and local regulatory requirements so that we will be ultimately able to obtain permits authorizing construction of a mine at the Pebble Project;

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

- that we will be able to secure sufficient capital necessary for continued environmental assessment and permitting activities and engineering work which must be completed prior to any potential development of the Pebble Project which would then require engineering and financing in order to advance to ultimate construction;
- that we will ultimately be able to demonstrate that a mine at the Pebble Project will be economically feasible based on a mine plan for which permitting can be secured;
- the U.S. Environmental Protection Agency's Proposed Determination process under the Clean Water Act will not have a negative impact on the ability of the Pebble Partnership to develop the Pebble Project;
- that the COVID-19 outbreak will not materially impact or delay our ability to obtain permitting for a mine at the Pebble Project;
- that the market prices of copper, gold, molybdenum, silver and rhenium will not significantly decline or stay depressed for a lengthy period of time;
- the projected contributions of the Pebble Project to the Alaskan and United States economies are subject to the assumptions underlying the 2021 PEA and other assumptions as to economic impact;
- that our key personnel will continue their employment with us; and
- that we will continue to be able to secure adequate financing on acceptable terms.

Readers are cautioned that the foregoing list is not exhaustive of all factors and assumptions that may have been used. Forward-looking statements are also subject to risks and uncertainties facing our business, any of which could have a material impact on our outlook.

Some of the risks we face and the uncertainties that could cause actual results to differ materially from those expressed in the forward-looking statements include:

- we may be unsuccessful in our appeal of the Record of Decision with respect to the decision to deny the issuance of permits which we require to operate a mine at the Pebble Project, and the timing of a decision on the appeal may be longer than anticipated;
- the issuance by the U.S. Environmental Protection Agency of a revised Proposed Determination under the Clean Water Act;
- our inability to ultimately obtain permitting for a mine at the Pebble Project;
- our inability to establish that the Pebble Project may be economically developed and mined or contain commercially viable deposits of ore based on a mine plan for which government authorities are prepared to grant permits;
- we may not be successful in defending shareholder securities litigation claims that have been filed against us in the U.S. and in Canada, and we may be obligated to indemnify our underwriters in addition to being subject to liabilities to the plaintiffs;
- the uncertainty of the outcome of current or future government investigations and inquiries, including but not limited to, matters before the U.S. Department of Justice, a federal grand jury in Alaska and the U.S. Securities and Exchange Commission (the "SEC");
- government efforts to curtail the COVID-19 pandemic may delay the Company in completion of its work relating to this permitting process;
- our ability to obtain funding for working capital and other corporate purposes associated with advancement of the Pebble Project;
- an inability to continue to fund exploration and development activities and other operating costs;
- our actual operating expenses may be higher than projected;
- the highly cyclical and speculative nature of the mineral resource exploration business;

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

- the pre-development stage economic viability and technical uncertainties of the Pebble Project and the lack of known reserves on the Pebble Project;
- an inability to recover even the financial statement carrying values of the Pebble Project if we cease to continue on a going concern basis;
- the potential for loss of the services of key executive officers;
- a history of, and expectation of further, financial losses from operations impacting our ability to continue on a going concern basis;
- the volatility of copper, gold, molybdenum, silver and rhenium prices and share prices of mining companies;
- uncertainty related to the conflict in Ukraine;
- the inherent risk involved in the exploration, development and production of minerals, and the presence of unknown geological and other physical and environmental hazards at the Pebble Project;
- the potential for changes in, or the introduction of new, government regulations relating to mining, including laws and regulations relating to the protection of the environment and project legal titles;
- potential claims by third parties to titles or rights involving the Pebble Project;
- the uncertainty of the outcome of current or future litigation including but not limited to, the appeal of the Record of Decision denying the issuance of permits required to operate a mine at the Pebble Project;
- the possible inability to insure our operations against all risks;
- the highly competitive nature of the mining business;
- the projected contributions of the Pebble Project to the United States federal, state and regional economies may not be realized;
- the potential equity dilution to current shareholders due to future equity financings or from the exercise of outstanding share purchase options and warrants to purchase the Company's common shares; and
- that we have never paid dividends and will not do so in the foreseeable future.

While the effort was made to list the primary risk factors, this list should not be considered exhaustive of the factors that may affect any of our forward-looking statements or information. Forward-looking statements or information are statements about the future and are inherently uncertain, and actual achievements of the Company or other future events or conditions may differ materially from those reflected in the forward-looking statements or information due to a variety of risks, uncertainties and other factors, including, without limitation, the risks and uncertainties described above. See [1.15.5 Risk Factors](#) and the risk factors and related discussions in the Company's annual information form for the year ended December 31, 2021 (the "**2021 AIF**") and 2021 Annual MDA.

Our forward-looking statements and risk factors are based on the reasonable beliefs, expectations and opinions of management on the date of this MD&A. Although we have attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There is no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Accordingly, readers should appreciate the inherent uncertainty of, and not place undue reliance on forward-looking information. We do not undertake to update any forward-looking information, except as, and to the extent required by, applicable securities laws.

For more information on the Company, investors should review the Company's 2021 AIF, the 2021 Annual MD&A and other continuous disclosure filings that are available on SEDAR at www.sedar.com, and the Company's Annual Report on Form 40-F filed with the SEC available at www.sec.gov.

Cautionary Note to Investors Concerning Estimates of Measured, Indicated and Inferred Resources

The following section uses the terms "Measured Resources", "Indicated Resources" and "Inferred Resources". The Company advises investors that these terms are recognized and required by Canadian regulations under National Instrument 43-101, *Standards of Disclosure for Mineral Properties* ("**43-101**"). The SEC has adopted amendments to its disclosure rules to modernize the mineral property disclosure required for issuers whose securities are registered with the SEC under the *U.S. Securities Exchange Act of 1934* ("**The SEC Modernization Rules**"). The SEC Modernization Rules include the adoption of definitions of the terms and categories of resources which are "substantially similar" to the corresponding terms under Canadian Regulations in 43-101. Accordingly, there is no assurance any mineral resources that we may report as Measured Resources, Indicated Resources and Inferred Resources under 43-101 would be the same had we prepared the resource estimates under the standards adopted under the SEC Modernization Rules. Investors are cautioned not to assume that all or any part of the mineral deposits in these categories will ever be converted into reserves.

In addition, Inferred Resources have a great amount of uncertainty as to their economic and legal feasibility. Under Canadian rules, estimates of Inferred Resources may not form the basis of feasibility or pre-feasibility studies, or economic studies except for a Preliminary Economic Assessment as defined under 43-101.

Abbreviations commonly used in the Overview, Permitting and other sections

CWA	Clean Water Act
EIS	Environmental Impact Statement
EPA	U.S. Environmental Protection Agency
NEPA	National Environmental Policy Act
ROD	The Record of Decision issued by the USACE on the Pebble Project in November 2020
USACE	U.S. Army Corps of Engineers

1.2 Overview

Northern Dynasty is a mineral exploration company which, through its wholly-owned Alaskan registered limited partnership, the Pebble Limited Partnership (the "**Pebble Partnership**"), holds a 100% interest in mining claims that are part of or in the vicinity of the Pebble Copper-Gold-Molybdenum-Silver-Rhenium Project (the "**Pebble Project**" or "**Pebble**") in southwest Alaska, USA ("**U.S.**"). The Company's business in Alaska is operated through the Pebble Partnership.

The Pebble Project is an initiative to develop one of the world's most important mineral resources. Pebble has the potential to produce significant quantities of important metals such as copper which is considered to be essential for green power and electrification technologies, including EVs. Pebble also contains a globally significant resource of rhenium, used in jet engines and related military applications and as a catalyst in industrial applications for the production of such things as high octane, lead-free gasoline. Recent global events have demonstrated the fragility and insecurity of the global supply chain, and further underscored the need for America to achieve security over important commodities, a key part of the energy transition. The Pebble Project would help the U.S. to advance the goal of mineral security.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

The current estimate of the Pebble Mineral Resources¹ at a 0.30% copper equivalent cut-off grade comprises:

- 6.5 billion tonnes in the combined **Measured and Indicated** categories at a grade of 0.40% copper, 0.34 g/t gold, 240 ppm molybdenum, 1.7 g/t silver and 0.41 ppm rhenium, containing 57 billion pounds of copper, 71 million ounces of gold, 3.4 billion pounds of molybdenum, 345 million ounces of silver and 2.6 million kilograms of rhenium; and
- 4.5 billion tonnes in the **Inferred** category at a grade of 0.25% copper, 0.25 g/t gold, 226 ppm molybdenum, 1.2 g/t silver and 0.36 ppm rhenium, containing 25 billion pounds of copper, 36 million ounces of gold, 2.2 billion pounds of molybdenum, 170 million ounces of silver and 1.6 million kilograms of rhenium.

Preliminary Economic Assessment presents robust projected financial results and globally significant potential metal production with excellent optionality

In September 2021, the Company announced the results of a Preliminary Economic Assessment ("**2021 PEA**") of the Pebble Project, providing updated production, financial and cost estimates for its proposed Pebble Project (the "**Proposed Project**") as described in the Pebble Project permit application and its amendments, which recently underwent a comprehensive review by the USACE culminating in their publishing of the Pebble EIS. In addition to the Proposed Project, the 2021 PEA examines three potential mine expansion scenarios, and potential alternative strategies for gold recovery that could form the basis for future permit applications and review. U.S. dollars and U.S. standard units are used unless otherwise indicated. All results are post-tax.

The Proposed Project detailed in the 2021 PEA is consistent with the Project Description in the Pebble EIS, published by the USACE in July 2020. It does not include an onsite gold plant. With the exception of the Proposed Project, all potential expansion scenarios evaluated in the 2021 PEA are presented to demonstrate the optionality inherent in the polymetallic Pebble deposit by presenting a broad range of potential pathways for future mine development. The 2021 PEA also models other scenarios for potential development in the future, to show how the project life could be extended and metal production enhanced through an expansion at different points in time or via alternative treatment scenarios. Neither Northern Dynasty nor the Pebble Partnership has proposed or intends to propose any of these potential expansion scenarios in the near-term

¹ David Gaunt, P.Geol., a qualified person as defined under 43-101, who is not independent of Northern Dynasty, is responsible for the mineral resource estimate, effective date August 18, 2020.

The Measured and Indicated Resources include 577 Mt of Measured grading 0.65% CuEq (0.33% Cu, 0.35 g/t Au, 178 ppm Mo, 1.7 g/t Ag and 0.32 ppm Re) and 5,529 Mt of Indicated grading 0.77% CuEq (0.41% Cu, 0.34 g/t Au, 246 ppm Mo, 1.7 g/t Ag and 0.41 ppm Re).

Copper equivalent ("**CuEq**") calculations use metal prices: US\$1.85/lb for Cu, US\$902/oz for Au and US\$12.50/lb for Mo, and recoveries: 85% Cu, 69.6% Au, and 77.8% Mo (Pebble West zone) and 89.3% Cu, 76.8% Au, 83.7% Mo (Pebble East zone). Contained metal calculations are based on 100% recoveries. A 0.30% CuEq cut-off is considered to be appropriate for porphyry deposit open pit mining operations in the Americas.

The mineral resource estimate is constrained by a conceptual pit shell that was developed using a Lerchs-Grossman algorithm and is based in the following parameters: 42 degree pit slope; metal prices and recoveries of US\$1,540.00/oz and 61% Au, US\$3.63/lb and 91% Cu, US\$20.00/oz and 67% Ag and US\$12.36/lb and 81% Mo, respectively; a mining cost of US\$1.01/ton with a US\$0.03/ton/bench increment and other costs (including processing, G&A and transport) of US\$6.74/ton. All mineral resource estimates, cut-offs and metallurgical recoveries are subject to change as a consequence of more detailed analyses that would be required in pre-feasibility and feasibility studies.

For further information on analytical, QAQC and data verification, and the estimate, refer to the Preliminary Economic Assessment 43-101 Technical Report, Pebble Project, Alaska, USA, effective date September 9, 2021, which is described below.

The mineral resource estimates contained herein have not been adjusted for any risk that the required environmental permits may not be obtained for the Pebble Project. The risk associated with the ability of the Pebble Project to obtain required environmental permits is a risk to the reasonable prospects for eventual economic extraction of the mineralisation and its classification as a mineral resource.

Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

for regulatory approval. Any future development options beyond the Proposed Project would require extensive federal, state and local permitting processes and approvals before proceeding, which would be in addition to the initial permits and approvals required for the Proposed Project.

Summary of Key Projected Results²

Proposed Project

- 20 years of open pit mining with a processing rate of 180,000 tons per day ("Tpd")
- At forecast long-term³ metal prices, Internal Rate of Return ("IRR") of 15.7% and Net Present Value at 7% discount rate ("NPV₇") of US\$2.3 billion
- Life-of-mine ("LOM") metal production for this scenario: 6.4 billion lb copper; 7.3 million oz gold; 300 million lb molybdenum; 37 million oz silver; and 230,000 kg rhenium
- Average annual metal production: 320 million lb copper; 363,000 oz gold; 15 million lb molybdenum; 1.8 million oz silver and 12,000 kg rhenium
- Average co-product C1 Copper Cost of US\$1.65/lb CuEq and Gold Cash Cost of US\$753/oz AuEq⁴; All-In Sustaining Cost ("AISC") (co-product basis) of US\$1.88/lb CuEq
- Average annual Net Smelter Return ("NSR") of US\$1.6 billion and LOM NSR of US\$32 billion

Potential Expansion Scenarios

- 90 to 101 year mine life with a peak processing rate of up to 270,000 Tpd
- IRR of 18.1% to 21.5% and NPV₇ of US\$5.7 to US\$8.5 billion
- LOM metal production for these scenarios: 60 billion lb copper; 50 million oz gold; 2.9 billion lb molybdenum; 267 million oz silver; and 2 million kg rhenium
- Average annual metal production: 600 million lb copper; 500,000 oz gold; 29 million lb molybdenum; 2.6 million oz silver and 20,000 kg rhenium
- Average C1 Copper Cost of US\$1.54/lb CuEq to US\$1.56/lb CuEq and Gold Cash Cost of US\$699/oz to \$712/oz; AISC (co-product basis) of US\$1.74/lb to US\$1.77/lb
- Average annual NSR of US\$2.8 to US\$3.2 billion and LOM NSR of US\$285 billion

Onsite Gold Plant (potential addition at Production year 5)

- Proposed Project
 - At forecast long-term metal prices, IRR of 16.5% and NPV₇ of US\$2.7 billion
 - LOM gold and silver production for this scenario: 9.0 million oz and 39 million oz, respectively
- Expansion Scenarios
 - IRR of 18.8% to 22.7% and NPV₇ of US\$6.6 to US\$9.7 billion
 - LOM gold and silver production for these scenarios: 65 million oz and 289 million oz, respectively

Additional information on the 2021 PEA is provided in [1.2.2.1 Preliminary Economic Assessment](#) and in the report entitled "Preliminary Economic Assessment NI 43-101 Technical Report, Pebble Project, Alaska, USA", effective date September 9, 2021, by R. Kalanchey, P.Eng., Ausenco, Hassan Ghaffari, P.Eng., Tetra Tech, Sabry Abdel Hafez, P.Eng., Tetra Tech, Les Galbraith, P.Eng., P.E., Knight Piesold, J. David Gaunt, P.Geo., Hunter Dickinson Services, Eric Titley, P.Geo., Hunter Dickinson Services, Stephen Hodgson, P.Eng., Hunter Dickinson

² All cases include infrastructure outsourcing and gold streaming and may require additional permitting

³ All cases here use forecast long-term metal prices (US\$): copper \$3.50/lb; gold \$1,600/oz; molybdenum \$10/lb; silver \$22/oz; rhenium \$1,500/kg

⁴ CuEq calculations use metal prices: US\$1.85/lb for Cu, US\$902/oz for Au and US\$12.50/lb for Mo, and recoveries: 88% Cu, 75% Au, and 82% Mo; AuEq calculation uses long term metal prices

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis

Services and James Lang, P.Geo., JM Lang Professional Consulting⁵, filed under Northern Dynasty's profile at www.sedar.com and www.sec.gov. Investors should review the information presented in this MD&A and the Company's 2021 AIF regarding the 2021 PEA in the context of the full information presented in the Preliminary Economic Assessment NI 43-101 Technical Report.

Economic Contribution Assessment study for the Pebble Project

On February 28, 2022 the Company announced the results of the '*Economic Contribution Assessment of the Proposed Pebble Project to the US national and state economies*', an independent expert study by IHS Markit (now S&P Global), a leading global source of critical information and insight. The IHS Markit report provides a detailed review of the significant economic impact that the Pebble Project, if developed, could have both nationally and at the state level, but particularly for Alaskans. The report focuses on two of the potential scenarios presented in the 2021 PEA: the Proposed Project and the Production Year 5 Potential Expansion Scenario with Gold Plant. The IHS Markit report is based on the production scenarios and related assumptions as presented in the 2021 PEA. Any changes to the production scenarios outlined in the 2021 PEA as a result of these factors could have a material impact on the projections implied by the IHS Markit report.

Results are presented for three time horizons:

- The Initial capital phase, which is common to both scenarios;
- Year 1 through Year 5. Differences in the economic contributions between the scenarios are due to the capital investments required to expand mine capacity and add the gold plant in the Year 5 Potential Expansion Scenario. For example, during this period, the Proposed Project would support 5,698 full time high paying jobs across the United States; the Production Year 5 Potential Expansion Scenario with Gold Plant would support 13,763 of these jobs; and
- Year 6 through Year 20, which allows for comparing the difference in "steady state" mining operations of both scenarios. For example, the Proposed Project would support 5,667 full time high paying jobs across the United States, whereas the Production Year 5 Potential Expansion Scenario with Gold Plant would support 12,774 of these jobs.

In addition to economic benefits nationally and at the state level, the Pebble Project would bring benefits to the regions around the project which were highlighted in the IHS Markit report. This includes the Pebble Performance Dividend ("**PPD**") which was established by the Pebble Partnership in 2020 to provide a local revenue sharing program to full time residents in communities in southwest Alaska. The report provides the average payments under both scenarios, assuming that all residents in the region are enrolled:

- For example, under the Proposed Project scenario, annual average PPD payments of US\$10.9 million, or US\$6,525 to a household of three would be made during the years in which the mine was operating; and
- Under the Production Year 5 Potential Expansion Scenario with Gold Plant, annual average PPD payments would be made of US\$39.1 million, or US\$23,475 per household of three.

The results of the Economic Contribution Assessment study are summarized in detail in the Company's February 28, 2022 news release. Additional information on the Economic Contribution Assessment study can be found on the Company's website at www.northerndynastyminerals.com/responsible-mining/economic-benefits. The information regarding the Economic Contribution Assessment study in the Company's press release and on the Company's web site is not incorporated into this MD&A.

⁵ Qualified Persons ("**QPs**") Kalanchey, Ghaffari, Abdel Hafez and Galbraith are independent of Northern Dynasty. QPs Gaunt, Titley, Hodgson and Lang are not independent of the Company.

Other Activities

A CWA 404 Permit Application for the Pebble Project was submitted to the USACE by the Pebble Partnership in December 2017 and the federal permitting process was initiated in January 2018, led by the USACE. From that time to the ROD announcement by the USACE in November 2020, most of the activities of the Company, through the Pebble Partnership, were focused on support of this process and included ongoing technical studies, responses to requests for information, and stakeholder engagement and consultation. While this work continued post-receipt of the ROD through 2020 and 2021, and is ongoing in 2022, the focus has shifted to Pebble Partnership's appeal of the negative ROD by the USACE (see [1.2.1.1, Permitting](#), for more details on the process and aspects of it, including the EIS, compensatory mitigation and the appeal of the ROD). The USACE completed the administrative record for the appeal and provided a copy to the Pebble Partnership in June 2021, following which the Pebble Partnership and its legal counsel reviewed the voluminous record for completeness and relevance to the USACE's permitting decision, and its sufficiency to support a fair, transparent and efficient review. In August 2021, the USACE informed the Pebble Partnership that a new Review Officer ("**RO**") had been appointed to lead the Pebble Project appeal. An appeal conference is currently scheduled for the summer of 2022. The timing for the final decision on the appeal remains uncertain.

On September 9, 2021, the EPA announced they planned to re-initiate the process of making a CWA Section 404(c) determination for the waters of Bristol Bay (the "**Proposed Determination**"), which would set aside the 2019 withdrawal of that action that was based on a 2017 settlement agreement between the EPA and Pebble Partnership. The Company believes the results of the Pebble EIS support the 2019 withdrawal. The 2019 withdrawal of the Proposed Determination was contested by Project opponents. In that litigation, the EPA requested the court vacate the withdrawal decision and remand the case to the EPA, which would result in the reinstatement of the Proposed Determination. The Pebble Partnership filed a response to this request in October, asking the Court to impose a schedule ensuring that the EPA is not able to regulate by inaction. On October 29, 2021, the court granted the EPA's motion for remand and vacated the EPA's withdrawal decision, thus reinstating the Section 404(c) Proposed Determination. The Court declined to impose a schedule on the EPA's proceedings on remand. The EPA subsequently extended the deadline to either withdraw the Proposed Determination or to prepare a recommended determination regarding the Pebble Project until May 31, 2022. The EPA has announced that this extended timeline will allow the EPA to consider available information, including the substantial volume of new information that has become available since the EPA issued the Proposed Determination, to determine its next steps in the Section 404(c) process. As part of its review process, the EPA issued a letter dated January 27, 2022, to the Pebble Partnership advising as to the EPA's belief that the discharge of dredged or fill associated with mining of the Pebble Project could result in unacceptable adverse effects on important fishery areas and of its intent to issue a revised Proposed Determination. The EPA's letter was also addressed to the USACE and the State of Alaska Department of Natural Resources. The EPA invited the Pebble Partnership, the USACE, the State of Alaska Department of Natural Resources to submit information "*to demonstrate that no unacceptable adverse effects to aquatic resources*" would result from the Pebble Project. The Pebble Partnership responded to the EPA on March 28, 2022 contesting both the factual claim by the EPA as to the impact on aquatic resources and the legal basis on which the EPA has proposed to act. Specifically, the Pebble Partnership has asserted that:

- The EPA has failed to appropriately consider the revised smaller footprint mine plan for the Pebble Project reflected in the Pebble EIS, versus the original mine plan that was the subject of the original 2014 Proposed Determination. In addition, the EPA failed to fully consider the mitigation measures proposed and summarized in the Pebble EIS;
- The EPA's authority to undertake a Proposed Determination under Section 404(c) is narrowly prescribed by the CWA statute and regulations and is only to be used as a last resort. As the EPA still has a full opportunity to participate in the EIS and CWA permit review processes for the Pebble Project, the EPA's use of the veto at this stage is unwarranted and unjustified. Rather, the EPA should only act under Section 404(c) if the USACE proposes to issue a permit to which the EPA objects;
- The EPA's assertion of impacts to fishery areas is not supported and is contradictory to the conclusion in the Pebble EIS that the Pebble Project would have no measurable impact on returning salmon;

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

- A Section 404(c) veto would violate the rights of the State of Alaska established under the Alaska Statehood Act and would undermine the State's legally protected interests in the development of lands it intentionally acquired and designed for mineral development; and
- There is a critical need for the minerals that would be produced by the Pebble Project which are essential to the transition to renewable energy sources to reduce climate impacts from fossil fuels. The EPA must consider the need for the Pebble Project in light of this demand, and the environmental and social costs that would result from a determination not to proceed with the development of a U.S. based source of the minerals needed to support the clean energy transition.

The State of Alaska also responded to the EPA's letter by letter dated March 28, 2022. The State of Alaska advised the EPA of its position that the issuance of a Section 404(c) veto would contravene the Alaska Statehood Act, the Cook Inlet Land Exchange Act and potentially the "takings clause" of the United States Constitution. The State of Alaska also stated its view that the issuance of a Section 404(c) Proposed Determination would conflict with both federal and state laws and short-circuit the longstanding, science-based and thorough processes for environmental review and regulatory compliance under the existing federal and state permitting processes. The State noted that it has a comprehensive, robust and rigorous set of environmental laws that serve to avoid and minimize impacts to lands, waters, habitats, and resident species, and that these laws would be bypassed were the EPA to proceed unilaterally. The State also expressed its view that bypassing the federal and state permitting process would deprive the EPA of the ability to fully evaluate the protections that would be imposed on the Pebble Project and accurately gauge the impacts of the project.

Future action by the EPA could negatively affect the ability of the Pebble Partnership to obtain required permitting and develop the Project, even if the appeal of the 2020 ROD is successful. The Company will continue to monitor these developments closely to determine the possible impacts to the project and permitting process, as it remains the Company's position that the withdrawal of the preemptive veto by the EPA was sound and appropriate.

In 2022, the Company has been advancing its plans to complete a site program that will include ongoing site maintenance and activities to support permits. The Company also continues to maintain an active corporate presence in Alaska and Washington, D.C., to engage and consult with project stakeholders through the Pebble Partnership. Corporate activities continue to be directed toward the appeal of the ROD, raising capital, as necessary, to support the permitting process, corporate reporting and discussions directed toward securing a partner with which to advance the overall development of the project.

From 2001, when Northern Dynasty's involvement with the Pebble Project began, to March 31, 2022, a total of \$994 million (US\$895 million) has been invested to advance the project.⁶

Corporate

As at March 31, 2022, the Company had \$17.9 million in cash and cash equivalents and working capital of \$17.3 million.

⁶ Of this, approximately \$595 million (US\$573 million) was provided by a wholly-owned subsidiary of Anglo American plc, which participated in the Pebble Partnership from 2007 to 2013, and the remainder was financed by Northern Dynasty. A major part of the 2007-2013 expenditures were on exploration, resource estimation, environmental data collection and technical studies, with a significant portion spent on engineering of possible mine development models, as well as related infrastructure, power and transportation systems. The technical and engineering studies that were completed during the period prior to December 2013 relating to mine-site and infrastructure development provide background support for management's current understanding of the most likely development scenarios for the Project. However, the scenarios evaluated during that period are not considered to be current. Accordingly, the Company is uncertain as to the extent to which it can realize significant value from this prior work. Environmental baseline studies and data, as well as geological and exploration information, remain important information available to the Company to advance the project.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

Although, the Company has prioritized the allocation of its available financial resources to meet key corporate and Pebble Project expenditure requirements in the near term, including the funding of the appeal of the ROD and other matters addressed in [1.5.3 Plan of Operations](#), additional financing will be required beyond the twelve-month period for the further development of the project. The Company has in place an At-the-Market Offering Agreement, whereby the Company as at March 31, 2022, can sell through the agent, up to US\$13.8 million in common shares (the "ATM Facility") (refer [1.2.3 At-The-Market Offering](#)). The ATM Facility does not restrict the Company from conducting other financings through any or a combination of debt and equity and/or contributions from possible new Pebble Project participants; however, there can be no assurances that it will be successful in obtaining additional financing. If the Company is unable to raise the necessary capital resources to meet obligations as they come due, the Company will at some point have to reduce or curtail its operations.

1.2.1 Pebble Project

The Pebble Project is located in southwest Alaska, approximately 17 miles from the villages of Iliamna and Newhalen, and approximately 200 miles southwest of the city of Anchorage. Situated in an area of rolling hills approximately 1,000 feet above sea-level and 125 miles from Bristol Bay, the site conditions are generally favorable for the mine site and infrastructure development.

1.2.1.1 Project Background and Status

The Pebble deposit was discovered in 1989 by a prior operator, which by 1997 had developed an initial outline of the deposit.

Northern Dynasty has been involved in the Pebble Project since 2001. Exploration since that time has led to significant expansion of the mineral resources in the Pebble deposit, including a substantial volume of higher grade mineralization in its eastern part. The deposit also remains open to further expansion at depth and to the east. A number of other occurrences of copper, gold and molybdenum have also been identified along the extensive northeast-trending mineralized system that underlies the property. The potential of these earlier-stage prospects has not yet been fully explored.

Comprehensive deposit delineation, environmental, socioeconomic and engineering studies of the Pebble deposit began in 2004. A Preliminary Assessment of the Pebble Project completed in 2011 provided initial insights into the size and scale of project that the Pebble resource might support. The Pebble Partnership continued to undertake detailed engineering, environmental and socioeconomic studies over the next two years.

The 27,000-page Environmental Baseline Document ("**EBD**") for the Pebble Project was publicly released in 2012. The 2012 EBD characterizes a broad range of environmental and social conditions in southwest Alaska – including climate, water quality, wetlands, fish and aquatic habitat, wildlife, land and water use, socioeconomics and subsistence activities during the period 2004-2008 and from some disciplines in 2009. Data from the 2009-2013 period was compiled into the Supplemental EBD (2009 to 2013), and both volumes were substantively updated since 2012. Data collected through 2019 was also provided to USACE for the Pebble EIS process. Wetlands field work was conducted in the summer of 2020 for the purpose of verifying appropriate wetlands quality/quantity for the new compensatory mitigation plan ("**CMP**") in the Koktuli watershed.

In February 2014, the EPA announced the Proposed Determination under the CWA to consider restriction or a prohibition of mining activities associated with the Pebble deposit. A multi-dimensional strategy, including legal and other initiatives to ward off this action undertaken by Northern Dynasty and the Pebble Partnership from 2014-2017 were successful, resulting in the joint settlement agreement announced on May 12, 2017, and enabling the project to move forward with state and federal permitting. As part of the joint settlement agreement, the EPA agreed to initiate a process that led to the withdrawal of the Proposed Determination in July 2019.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

On April 17, 2020, a US federal district court judge in Alaska ruled in favour of the EPA by granting a motion to dismiss a case brought by a collection of litigants opposed to the Pebble Mine that challenged the EPA's July 2019 decision to formally withdraw its Proposed Determination under Section 404(c) of the CWA. The ruling was based on a determination that the litigants had failed to state a claim upon which relief can be granted. This dismissal was appealed to the Ninth Circuit Court of Appeals. On June 17, 2021, the Ninth Circuit Court of Appeals issued an opinion reversing in part the District Court's opinion and remanding the case to the Alaska federal district court to undertake further proceedings consistent with the decision of the Court of Appeals. Specifically, the Court of Appeals upheld the District Court's finding that the CWA contained no meaningful legal standard for judicial review in its broad grant of discretion to the EPA, but the Court of Appeals remanded the case because it found that EPA's regulations contain a meaningful legal standard for review. The case was therefore remanded to the District Court for further proceedings to determine whether the EPA's withdrawal of the proposed determination was arbitrary, capricious or an abuse of power contrary to law. On September 9, 2021, the EPA announced they planned to file a motion seeking remand of the withdrawal decision, which would re-initiate the Proposed Determination. The Pebble Partnership sought and was granted status as an intervenor and filed a response to the EPA's motion in October 2021, asking the Court to impose a schedule requiring the EPA to issue a final decision on the 2014 Proposed Determination under the CWA, whether that be to withdraw or finalize it. On October 29, 2021 the court granted the EPA's motion for remand, vacating the EPA's withdrawal decision, and thus reinstating the Section 404(c) Proposed Determination, without imposing any schedule on the agency. The EPA subsequently extended the deadline to either withdraw the Proposed Determination or to prepare a Recommended Determination regarding the Pebble Project until May 31, 2022. See discussion above under "*Other Activities*".

Permitting

In the latter part of 2017, a project design was developed for the Pebble Project. The CWA 404 permit application was submitted to the USACE on December 22, 2017, initiating federal review for the Pebble Project under NEPA. Significant milestones in this permitting process are summarized below:

- In January 2018, the Pebble Partnership received notice from USACE that the CWA Act 404 permitting documentation was accepted and that an EIS would be required to comply with its NEPA review of the Pebble Project;
- On February 5, 2018, USACE announced the appointment of AECOM, a leading global engineering firm, as third-party contractor for the USACE EIS process;
- On March 19, 2018, USACE published guidelines and timelines for completing CWA permitting, and the associated USACE EIS process;
- Between April and August 2018, the Pebble Project was advanced through the Scoping Phase of the EIS process administered by the USACE, which included a 90-day public comment period. The Scoping Document was released on August 31, 2018;
- On February 20, 2019, USACE posted the draft EIS on its website, then initiated a public comment process on the draft EIS, which was completed on July 2, 2019;
- In February 2020, a preliminary version of the final EIS was distributed for comment and review to cooperating agencies and to tribes participating in the process;
- In March 2020, USACE announced it had decided on a Northern Transportation Route option as the draft Least Environmentally Damaging Practicable Alternative ("**LEDPA**") for accessing the proposed Pebble mine site, subsequent to which the Pebble Partnership revised its Proposed Project Description to align with the USACE selection. The Northern Transportation Route includes adjustments to the port site (location at Diamond Point with off-shore lightering station) and a road and pipeline route (located further to the north with no lake crossings or ferry terminals);
- In May 2020, the EPA issued a letter confirming the EPA's decision not to pursue so-called 3(b) elevation under the CWA 404(q) guidelines; and

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

- On July 24, 2020, the USACE posted the final Pebble EIS on its website.

Publication of the final Pebble EIS in July 2020 followed 2½ years of intensive review by the USACE and eight federal cooperating agencies (including the US Environmental Protection Agency and US Fish & Wildlife Service), three state cooperating agencies (including Alaska Department of Natural Resources and Alaska Department of Environmental Conservation), the Lake & Peninsula Borough and federally recognized tribes. The final Pebble EIS was viewed by the Company as positive in that it found impacts to fish and wildlife would not be expected to affect harvest levels, there would be no measurable change to the commercial fishing industry including prices and there would be a number of positive socioeconomic impacts on local communities.

The CWA 404 Permit Application submitted in December 2017, initiated the permitting process which involved the Pebble Partnership being actively engaged with the USACE on the evaluation of the Pebble Project. There were numerous meetings between representatives of the USACE and the Pebble Partnership regarding, among other things, compensatory mitigation for the Pebble Project. The Pebble Partnership submitted several draft compensatory mitigation plans to the USACE, each refined to address comments from the USACE and that the Pebble Partnership believed were consistent with mitigation proposed and approved for other major development projects in Alaska. In late June 2020, USACE verbally identified the "significant degradation" of certain aquatic resources, with the requirement of new compensatory mitigation. The Pebble Partnership understood from these discussions that the new compensatory mitigation plan for the Pebble Project would include in-kind, in-watershed mitigation and continued its work to meet these new USACE requirements.

The USACE formally advised the Pebble Partnership by letter dated August 20, 2020, that it had made preliminary factual determinations under Section 404(b)(1) of the CWA that the Pebble Project as proposed would result in significant degradation to aquatic resources. In connection with this preliminary finding of significant degradation, the USACE formally informed the Pebble Partnership that in-kind compensatory mitigation within the Kaktuli River watershed would be required to compensate for all direct and indirect impacts caused by discharges into aquatic resources at the mine site. The USACE requested the submission of a new compensatory mitigation plan to address this finding within 90 days of its letter.

Based on these requirements, the Pebble Partnership developed a new CMP to align with the requirements outlined by the USACE as conveyed to the Pebble Partnership. This plan envisioned creation of an 112,445-acre Kaktuli Conservation Area on land belonging to the State of Alaska in the Kaktuli River watershed downstream of the Project. During the period in which this CMP was developed, the Pebble Partnership continued to confer with the USACE regarding its proposed approach to mitigation. An initial draft of the CMP was submitted to the USACE for an interim review by the USACE in September 2020. The Pebble Partnership then revised the CMP based on the input from the USACE. The objective of the preservation of the Kaktuli Conservation Area was to allow the long-term protection of a large and contiguous ecosystem that contains aquatic and upland habitats. If adopted, the Kaktuli Conservation Area would preserve 31,026 acres of aquatic resources within the Kaktuli River watershed. The protected resources were designed to address the physical, chemical, and biological functions highlighted by the EPA and the U.S. Fish & Wildlife Service. Preservation of the Kaktuli Conservation Area was proposed with the objective of minimizing the threat to, and preventing the decline of, aquatic resources in the Kaktuli River watershed from potential future actions, and sustaining the fish and wildlife species that depend on these aquatic resources, while protecting the subsistence lifestyle of the residents of Bristol Bay and commercial and recreational sport fisheries. The revised plan was submitted to the USACE on November 4, 2020.

On November 25, 2020, the USACE issued the ROD. The ROD rejected the compensatory mitigation plan as "noncompliant" and determined the Pebble Project would cause "significant degradation" and was contrary to the public interest. Based on this finding, the USACE rejected Pebble Partnership's permit application under the CWA.

The Pebble Partnership submitted a request for appeal of the ROD (the "RFA") to the USACE Pacific Ocean Division on January 19, 2021. The RFA reflects the Pebble Partnership's position that the USACE's ROD and

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

permitting decision are contrary to law, unprecedented in Alaska, and fundamentally unsupported by the administrative record, including the Pebble Project EIS. The specific reasons for appeal asserted by the Pebble Partnership in the RFA include (i) the finding of "significant degradation" by the USACE is contrary to law and unsupported by the record, (ii) the USACE's rejection of the Pebble Partnership's compensatory mitigation plan is contrary to USACE regulations and guidance, including the failure to provide the Pebble Partnership with an opportunity to correct the alleged deficiencies, and (iii) the determination by the USACE that the Pebble Project is not in the public interest is contrary to law and unsupported by the public record.

On January 22, 2021, the State of Alaska, acting in its role as owner of the Pebble lands and subsurface mineral estate, announced that it had also filed a request for appeal. That appeal was rejected on the basis that the State did not have standing to pursue an administrative appeal with the USACE.

In a letter dated February 24, 2021, the USACE confirmed the Pebble Partnership's RFA is "complete and meets the criteria for appeal." The USACE completed the administrative record for the appeal and provided a copy to the Pebble Partnership in June 2021, following which the Pebble Partnership and its legal counsel reviewed the voluminous record for completeness and relevance to the USACE's permitting decision, and its sufficiency to support a fair, transparent and efficient review. In August 2021, the USACE also informed the Pebble Partnership that a new RO had been appointed to lead the Pebble Project appeal. The appeal will be reviewed by the USACE based on the administrative record and any clarifying information provided, and the Pebble Partnership will be provided with a written decision on the merits of the appeal at the conclusion of the process. The appeal is governed by the policies and procedures of the USACE administrative appeal regulations. While federal regulations suggest the appeal should conclude within 90 days, and in no case should extend beyond one year, the USACE has indicated the complexity of issues and volume of materials associated with Pebble's case means the review will take additional time. An appeal conference is currently scheduled for the summer of 2022. The timing for the final decision remains uncertain. There is no assurance that the Company's appeal of the ROD will be successful or that the required permits for the Pebble Project will ultimately be issued. The permits are required in order that the Pebble Project can be developed as proposed by the Company. If the Pebble Partnership's administrative appeal of the ROD is successful, then we anticipate that the permitting decision would be remanded back to the USACE's Alaska District in order that the permitting process would then continue based on the administrative record and the findings and determinations made by the USACE Pacific Division in its appeal decision. There is no assurance that a successful appeal will ultimately result in the issuance of a positive ROD by the USACE Alaska District. If the Pebble Partnership's administrative appeal is not successful, the Company may seek judicial review of the ROD in the appropriate US District Court. There is no assurance that any judicial review would be successful in overturning an unsuccessful appellate decision.

Project Description

Northern Dynasty, through Pebble Partnership, continued to advance engineering studies to refine the mine design and to support the EIS process. The results of this work were reported in updates to the Project Description.

During the permitting process, a number of transportation infrastructure routes and alternatives were assessed, and the USACE determined that the northern corridor route was the most appropriate LEDPA alternative. It is the Pebble Partnership's intent to undertake the actions necessary to acquire the rights to build and operate the most appropriate transportation and infrastructure corridor to allow the development of the State's and Pebble Partnership's mineral rights. Information on Right-of-Way agreements is provided in [1.2.1.3 Socioeconomic](#).

The final Pebble EIS analyzes the potential impacts of four action development alternatives, and a "No Action" alternative. The development option selected by USACE as the draft LEDPA is described in the June 2020 Project Description. It includes a proposed open-pit mining operation and associated ore processing facilities in southwest Alaska, an 82-mile road, pipeline and utilities corridor to a permanent, year-round port facility on Cook Inlet, a lightering location in Iniskin Bay, a 164-mile natural gas pipeline from existing energy

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

infrastructure on the Kenai Peninsula to the Pebble mine site, a 270 MW natural gas-fired power plant at the mine site and smaller power generation facility at the port site.

Over 20 years of mining, the Pebble Project as proposed will extract approximately 70 million tons of mineralized material annually at the extremely low strip ratio of 0.12:1. A conventional blast-haul-crush and froth flotation milling process with nameplate capacity of 180,000 tons per day will be employed to produce, on average, 613,000 tons of copper-gold concentrate each year (containing 318 million lb Cu, 362,000 oz Au and 1.8 million oz Ag) and 15,000 tons of molybdenum concentrate (containing 14 million lb Mo). The current mine plan proposal encompasses the important environmental safeguards previously described, including:

- a smaller footprint, consolidating major site infrastructure in a single drainage.
- a more conservative Tailings Storage Facility ("TSM") design, including enhanced buttresses, flatter slope angles and an improved factor of safety;
- separation of potentially acid generating ("PAG") tailings from non-PAG bulk tailings for storage in a fully-lined TSM;
- co-storage of PAG waste rock within the PAG TSM and transfer of the PAG tailings and waste rock to the open pit at closure;
- no permanent waste rock piles; and
- no secondary gold recovery plant.

The proposed project seeks to develop a portion of the currently estimated Pebble mineral resources. This does not preclude development of additional resources in other phases of the project in the future, although any subsequent phases of development would require extensive regulatory and permitting review by federal, state and local regulatory agencies, including a further comprehensive EIS review process under NEPA. During the NEPA process, the Pebble Partnership received a Request for Information ("RFI") from USACE for a description of a concept for an expanded Project. The Pebble Partnership prepared the description in response to the RFI and this response is included in the EIS Administrative Record.

In September 2021, the Company announced the results of the 2021 PEA, highlights of which are provided in the [Overview](#) and which is further described in [1.2.1.2 Preliminary Economic Assessment](#) below. The Proposed Project detailed in the 2021 PEA is consistent with the Project Description in the Pebble EIS, and reflects industry-leading tailings, waste and water management strategies proposed by the Pebble Partnership, as evaluated by the USACE in the Pebble EIS, as well as power and transportation infrastructure necessary for developing, operating and closing the proposed mine.

The three potential expansion scenarios evaluated in the 2021 PEA are modelled on a concept identified by the Pebble Partnership in a submission to the USACE in response to an RFI during the federal permitting process.

1.2.1.2 Technical Programs

Planning for the 2022 program, which includes site maintenance and reclamation of exploration activities in support of permits, was advanced in Q1. The six-week helicopter supported program is expected to begin mid-May and continue until the end of June. The main activities of the work program include:

- Site care and maintenance, including demobilization of equipment that is no longer actively being used at this time. A heavy lift helicopter will be mobilized to site for several days to facilitate the movement of the larger pieces back to the Company storage yards at the town of Iliamna until they are needed for future work programs.
- Removal of an old weather monitoring tower and shelter that are no longer needed due to completion of data collection at that site.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

- Inspection and permanent closure of select drill holes where the collection of baseline hydrology data for the site has been completed. Hole collars will be removed below ground level, hole plugs will be placed below the bedrock interface and the holes will be backfilled with grout and a cement cap. Sites will then be reclaimed and seeded as required.
- Work will be completed by a five-person field team supported using a single helicopter. All field crew members and PLP's onsite field supervisor are residents of the nearby communities of Kokhanok, Iliamna, and Newhalen. Prior to commencing the program, crew members will receive three days of refresher safety training and site and helicopter orientation. All crew members are returning hires that worked on last summer's successful field program.
- Work is being conducted with support from the Alaska Peninsula Corporation and Iliamna Development Corporation.

Preliminary Economic Assessment

The Company has advanced engineering, metallurgical and other technical studies to inform both internal and external understandings of how the project can be developed safely and profitably in future, and announced the results of the 2021 PEA in September 2021. For additional details, see below and in the Preliminary Economic Assessment NI 43-101 Technical Report filed under Northern Dynasty's profile at www.sedar.com and www.sec.gov.

The purpose of the 2021 PEA is to present the projected economics of the production plan and a corresponding project configuration which aligns with the June 2020 Revised Project Application (the Proposed Project), described under [1.2.1.1 Project Description](#) above. The 2021 PEA also explores potential expansion scenarios, and potential alternative strategies for gold recovery that could form the basis for future permit applications and review for the Project. The 2021 PEA is based on the 2020 Mineral Resource estimate, effective date August 18, 2020.

The Proposed Project evaluated in the 2021 PEA is a compact open pit mine feeding a conventional 180,000 Tpd copper flotation concentrator. It would be capable of processing 1.3 billion tons of mineralized material over 20 years of mining at a strip ratio of 0.12:1. The Proposed Project reflects industry-leading tailings, waste and water management strategies proposed by the Pebble Partnership, as evaluated by the USACE in the Pebble EIS, as well as power and transportation infrastructure necessary for developing, operating and closing the proposed mine.

The three potential expansion scenarios ("**Potential Expansion Scenarios**") examined in the 2021 PEA are modeled on a concept identified by the Pebble Partnership in an RFI submission to the USACE during the federal permitting process. The first Potential Expansion Scenario evaluated would expand the Pebble process plant from 180,000 to 250,000 Tpd following the 20-year project life envisioned in the Proposed Project, with subsequent mining and processing of an additional 6.3 billion tons of mineralized material. The second and third evaluated Potential Expansion Scenarios would expand the Pebble process plant to 270,000 Tpd in Production Year 10 and Production Year 5 of open pit production under the Proposed Project, respectively. All three Potential Expansion Scenarios process the same volume of mineralized material over the life of mine – 8.6 billion tons.

The Proposed Project and the Potential Expansion Scenarios in the 2021 PEA are preliminary in nature and include Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves. There is no certainty that the 2021 PEA results will be realized. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability, and there is no assurance that the Pebble Project mineral resources will ever be upgraded to reserves. The 2021 PEA assumes that the Proposed Project will ultimately be able to obtain the required federal and State of Alaska permits to enable development of the Proposed Project. Neither the 2021 PEA, nor the mineral resource estimates on which the 2021 PEA is based, have been adjusted for any risks that (i) the Pebble Partnership may not be able to successfully appeal the record of decision issued by the USACE on November 25, 2020, denying the granting of the required permit under the CWA, or (ii) any action

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

that may be taken by the EPA in order to reinstate the process of a CWA Section 404(c) determination for the waters of the Bristol Bay, each of which could adversely impact the ability of the Proposed Project to proceed. In addition, the 2021 PEA does not account for any additional capital or operating costs that may be necessary to obtain the required federal or state permits, should adjustments to the operating or environmental mitigation plans be required to be made in order to secure the required permits.

The below show forecast life of mine and annual production values with no gold plant.

Forecast Production - Proposed Project and Potential Expansion Scenarios (no gold plant)

		Proposed Project	Potential Expansion Scenarios		
			Year 21	Year 10	Year 5

Gold	k oz	9,000	65,000	65,100	64,900
Silver	k oz	39,000	289,000	289,000	289,000

Capital and Operating Costs

For the Proposed Project and the Potential Expansion Scenarios, the 2021 PEA considers the impact on each of financial results of third parties owning and financing the construction of key transportation and power infrastructure, as is commonly the case in Alaska. It is assumed these third parties would either construct the facilities through their own resources or they would be included in overall project construction management. The Pebble Partnership would lease, operate and maintain the facilities as part of overall mine operations, with lease payments set to provide a market rate of return to lessors.

The effective date of the cost estimates is Q1 2021. Estimated initial capital cost for these components, including indirect costs, owners' costs and contingency are:

- transportation infrastructure (marine terminal/related facilities and access road): US\$784 million
- power supply (mine site power plant and natural gas pipeline): US\$896 million

Financial results presented in the 2021 PEA and in the results table below also incorporate the impact of gold streaming. The calculation assumes that 30% of gold production at Pebble would be streamed at a delivery price of US\$500/oz in consideration for an estimated upfront payment of US\$1.3 billion.

Infrastructure outsourcing, gold streaming and the addition of an onsite gold plant have been examined in the 2021 PEA because Northern Dynasty believes this to be the most likely development outcome for the Pebble Project over time. Northern Dynasty does not have any arrangements or commitments for infrastructure or gold streaming in place, and any arrangements or commitments secured may ultimately be on different terms than those assumed in the 2021 PEA. While transportation and power infrastructure outsourcing agreements have not yet been negotiated for the Pebble Project, it is considered to be a realistic potential outcome. These arrangements are presented for the Proposed Project as the Base Case. A Full Capital Case, without the benefit of the precious metal stream financing and third-party infrastructure participation, was also evaluated for the Proposed Project.

Forecast initial capital costs for the Proposed Project are US\$6.0 billion, and do not include the projected costs of any of the Potential Expansion Scenarios as these options are evaluated in the 2021 PEA as extensions of the Proposed Project. Additional capital expenditures would be required to facilitate the addition of an onsite gold plant and development of the various Expansion Scenarios. The US\$6.0 billion capex estimate below includes

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

US\$1.7 billion in estimated costs for transportation infrastructure and power supply, which are expected to be outsourced, and the streaming revenue described above.

The 2021 PEA also incorporates annual costs for the closure plan described in the Pebble Project Final EIS. The peak estimated value of the Pebble closure fund will be \$1.4 billion for the Proposed Project and between US\$3.1 and US\$3.3 billion for the Potential Expansion Scenarios.

Management's Discussion And Analysis
Three months ended March 31, 2022

Financial Results

Long-term metal prices used are:

- Copper: US\$ 3.50/lb
- Gold: US\$ 1,600/oz
- Molybdenum: US\$ 10/lb
- Silver: US\$ 22/oz
- Rhenium: US\$ 1,500/kg

An economic model was developed to estimate annual pre-tax and post-tax cash flows and sensitivities of the Proposed Project and Potential Expansion Scenarios based on a 7% discount rate. By convention, a discount rate of 8% is typically applied to copper and other base metal projects, while 5% is applied to gold and other precious metal projects. Given the polymetallic nature of the Pebble deposit and the large contribution of gold to total revenues, a 7% blended discount rate was selected and is considered appropriate for the purposes of discounted cash flow analyses. The NPV₇ is calculated by discounting cash flows to start of construction.

The economic analysis for all Potential Expansion Scenarios included third party infrastructure and precious metal streaming partners.

Calendar years used in the economic analysis are provided for conceptual purposes only. Permits still must be obtained in support of operations and approval to proceed is still required from Northern Dynasty's Board of Directors.

The gold plant included in the potential expansion scenarios was based of metallurgical testwork results for a specific gold recovery technology. However, other technologies may be applicable for the Pebble deposit. Further, the addition of a gold plant under any scenario will require additional testwork and engineering and will require the receipt of pertinent Federal and State permits prior to implementation. The onsite gold plant would process the pyrite concentrate in conjunction with the gravity concentrate to produce a precious metal doré. In all but the Year 5 scenario, the gold plant capacity would match the 180,000 tons per day process plant capacity. In the Year 5 scenario, it would match the expanded plant capacity while in the Year 10 and Year 21 scenarios, it would be expanded with the process plant.

¹⁵ Revenue values do not include a gold plant contribution

The results of the 2021 PEA forecast a robust project that has the potential to add substantially to the Alaska economy, and could provide the U.S. with substantial amounts of domestically-produced copper, silver and gold, which it will need to help achieve its low carbon energy future. The Project could potentially provide more than US\$8 billion to the Southwest Alaska region through the PPD and the Lake and Peninsula Borough severance tax over the life of the Potential Expansion Scenarios. This is in addition to the other significant benefits that could flow from the existing and possible future agreements with Alaska Native Village Corporations.

1.2.1.3 Socioeconomic

Community Engagement

Pebble Project technical programs are supported by stakeholder engagement activities undertaken by the Pebble Partnership in Alaska. The objective of stakeholder outreach programs undertaken by the Pebble Partnership are to:

- advise residents of nearby communities and other regional interests about Pebble work programs and other activities being undertaken in the field;
- provide information about the proposed development plan for the Pebble Project, including potential environmental, social and operational effects, proposed mitigation and environmental safeguards;
- allow the Pebble Partnership to better understand and address stakeholder priorities and concerns with respect to development of the Pebble Project;
- encourage stakeholder and public participation in the regulatory permitting process for Pebble; and
- facilitate economic and other opportunities associated with advancement and development of the Pebble Project for local residents, communities and companies.

In addition to meeting with stakeholder groups and individuals, and providing project briefings in communities throughout Bristol Bay and the State of Alaska, the Pebble Partnership's outreach and engagement program have included:

- workforce and business development initiatives intended to enhance economic opportunities for regional residents and Alaska Native corporations;
- initiatives to develop partnerships with Alaska Native corporations, commercial fishing interests and other in-region groups and individuals;
- outreach to elected officials and political staff at the national, state and local levels; and
- outreach to third-party organizations and special interest groups with an interest in the Pebble Project, including business organizations, community groups, outdoor recreation interests, Alaska Native entities, commercial and sport fishery interests, and conservation organizations, among others.

Through these various stakeholder initiatives, the Company seeks to advance a science-based project design that is responsive to stakeholder priorities and concerns, provides meaningful benefits and opportunities to local residents, businesses and Alaska Native corporations, and energizes the economy of Southwest Alaska. This program of engagement and consultation also includes discussions to secure stakeholder agreements to support the project's development.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis

Right-of-Way Agreements and Other Community Initiatives

The Pebble Partnership has finalized Right-of-Way ("**ROW**") agreements with Alaska Native village corporations and other landowners with land holdings along proposed transportation and infrastructure routes for the Pebble Project. The ROW agreements secure access to portions of several proposed transportation and infrastructure routes to the Pebble Project site for construction and operation of the proposed mine and represents a significant milestone in the developing relationship between Pebble and the Alaska Native people of the region. Transportation and other infrastructure for a mine at Pebble is expected to benefit Alaska Native village corporations, their shareholders and villages through toll payments and user fees, contracting opportunities, and improved access to lower cost power, equipment and supplies, as well as enhanced economic activity in the region.

On June 16, 2020, the Company announced the Pebble Partnership has established the Pebble Performance Dividend LLC ("**PPD LLC**") to provide a local revenue sharing program with the objective of ensuring that full-time residents of communities in southwest Alaska benefit directly from the future operation of the proposed Pebble Project. The intention is for PPD LLC to distribute cash generated from a 3% net profits royalty interest in the Pebble Project to adult residents of Bristol Bay villages that have subscribed as participants, with a guaranteed minimum aggregate annual payment of US\$3 million each year the Pebble mine operates, beginning at the outset of project construction. Future payments following capital payback are expected to increase beyond this initial amount as estimated in the '*Economic Contribution Assessment of the Proposed Pebble Project to the US national and state economies*', prepared by IHS Markit.

A Memorandum of Understanding ("**MOU**") between the Pebble Partnership and APC was announced on July 6, 2020. The Alaska Peninsula Corporation ("**APC**") is an Alaska Native village corporation with extensive land holdings proximal to the Pebble site. The MOU envisages that APC will lead the development of a consortium of Alaska Native village corporations with land holdings along the Northern Transportation Route. It is contemplated that the consortium would provide road maintenance, truck transport, port operations and other logistical services to the Pebble Project should the development of the mine proceed. The MOU is consistent with the Company's strategy of ensuring the development of the Pebble Project will benefit local Alaska communities and people. The MOU is not a binding final contract. Any final contracts with APC or other Alaska Native village corporations will require further negotiation of commercial terms and negotiation of definitive contracts. There is no assurance that these contracts will be concluded or that the Alaska Native village corporations will support the Pebble Project.

Environmental, Social & Governance Report

In April 2021, the Company published an Environmental, Social & Governance ("**ESG**") Report for the Pebble Project which addresses the broad range of progressive principles, practices and commitments employed at Pebble by the Company and the Pebble Partnership over the past two decades to advance the project.

1.2.2 Legal Matters

Grand Jury Subpoena

On September 23, 2020, the Company announced that Tom Collier, the former Chief Executive Officer of the Pebble Partnership, had submitted his resignation in light of comments made about elected and regulatory officials in Alaska and the Pebble Project in private conversations covertly videotaped by an environmental activist group. Conversations with Mr. Collier, as well as others with Ron Thiessen, Northern Dynasty's President and Chief Executive Officer, were secretly videotaped or audiotaped by unknown individuals posing as representatives of a Hong Kong-based investment firm, which represented that it was linked to a Chinese State-Owned Enterprise (SOE). The Company understands that a Washington DC-based environmental group, the Environmental Investigation Agency, released portions of the recordings online after obscuring the voices and identities of the individuals posing as investors.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

Following the release of the recordings, the USACE issued a statement that, following a review of the transcripts of the recordings, they had “*identified inaccuracies and falsehoods relating to the permit process and the relationship between our regulatory leadership and the applicant’s executives*”. Further, the Pebble Partnership received a letter from the Committee on Transportation and Infrastructure of the United States House of Representatives on November 19, 2020, stating that the comments made by Mr. Collier and Mr. Thiessen regarding the expansion, capacity, size and duration of the potential Pebble mine were believed to be inconsistent with the testimony of Mr. Collier before the Committee and demanding production of documents apparently related to the comments. The Company has been producing documents in response to those requests. The Company also responded to the Committee by letter denying and refuting that there was any inconsistency as raised in the Committee’s November 19, 2020 correspondence.

On February 5, 2021, the Company announced that the Pebble Partnership and Tom Collier, the former Chief Executive Officer of the Pebble Partnership, had each been served with a subpoena issued by the United States Attorney’s Office for the District of Alaska to produce documents in connection with a grand jury investigation. The Company is not aware of any criminal charges having been filed against any entity or individual in this matter. The Company also self-reported this matter to the SEC, and there is a related inquiry being conducted by the enforcement staff of the SEC’s San Francisco Regional Office. The Company and the Pebble Partnership are cooperating with each of these investigations.

Class Action Litigation relating to the USACE’S Record of Decision

On December 4 and December 17, 2020, separate putative shareholder class action lawsuits were filed against the Company and certain of its current and former officers and directors in the U.S. District Court for the Eastern District of New York regarding the drop in the price of the Company’s stock following the ROD by the USACE regarding the Pebble Project. These cases are captioned *Darish v. Northern Dynasty Minerals Ltd. et al.*, Case No. 1:20-cv-05917-ENV-RLM, and *Hymowitz v. Northern Dynasty Minerals Ltd. et al.*, Case No. 1:20-cv-06126-PKC-RLM. Each of the complaints was filed on behalf of a purported class of investors who purchased shares of the Company’s stock from December 21, 2017, through November 25, 2020, the date the USACE announced its decision, and seeks damages allegedly caused by violations of the federal securities laws. On March 17, 2021, the two cases were consolidated and a lead plaintiff and counsel were appointed. A consolidated and amended complaint was filed in June 2021, naming the Company, the Company’s CEO and the Pebble Partnership’s former CEO as defendants. The Company intends to defend itself vigorously and has filed a motion to dismiss the complaint on behalf of all defendants.

On December 3, 2020, a putative shareholder class action lawsuit was filed against the Company, certain of its current and former officers and directors, and one of its underwriters in the Supreme Court of British Columbia regarding the decrease in the price of the Company’s stock following the USACE’s November 25, 2020 decision regarding the Pebble Project. The case is captioned *Haddad v. Northern Dynasty Minerals Ltd. et al.*, Case No. VLC-S-S-2012849. The claim was filed on behalf of a purported class of investors, wherever they may reside, who acquired common shares of the Company’s stock between December 21, 2017 and November 25, 2020, and seeks damages for (i) alleged misrepresentations in the Company’s primary market offering documents and continuous disclosure documents, and (ii) allegedly oppressive conduct. The Company has been served the claim and intends to defend itself vigorously. The underwriter has asserted contractual rights of indemnification against the Company for any loss that the underwriter may incur in connection with the lawsuit.

On February 17, 2021, a putative shareholder class action lawsuit was filed against the Company, certain of its current and former officers and directors, and certain of its underwriters in the Supreme Court of British Columbia regarding the decrease in the price of the Company’s stock following (i) the USACE’s August 24, 2020 announcement that the Pebble Project could not be permitted as proposed, and (ii) the USACE’s November 25, 2020 decision regarding the Pebble Project. The case is captioned *Woo v. Northern Dynasty Minerals Ltd. et al.*, Case No. VLC-S-S-211530. The claim was filed on behalf of a purported class of investors, wherever they may reside, who purchased securities of the Company between June 25, 2020 and November 25, 2020, and seeks damages for (i) alleged misrepresentations in the Company’s primary market offering documents and continuous disclosure documents, (ii) allegedly oppressive conduct, (iii) alleged unjust enrichment, and (iv)

negligence. The Company has been served and intends to defend itself vigorously. The underwriters have asserted contractual rights of indemnification against the Company for any loss that they may incur in connection with the lawsuit.

On March 5, 2021, a putative shareholder class action lawsuit was filed against the Company, certain of its current and former officers and directors, and certain of its underwriters in the Ontario Superior Court of Justice regarding the decrease in the price of the Company's stock following the USACE's November 25, 2020 decision regarding the Pebble Project. The case is captioned *Pirzada v. Northern Dynasty Minerals Ltd. et al.*, Case No. CV-21-00658284-00CP. The claim was filed on behalf of a purported class of investors, wherever they may reside, who acquired securities of the Company between June 25, 2020 and November 25, 2020, and seeks damages for (i) alleged misrepresentations in the Company's primary market offering documents and continuous disclosure documents, (ii) allegedly oppressive conduct, and (iii) alleged negligence. On March 30, 2022, the plaintiff made a motion to discontinue the claim without costs and the court granted the discontinuance in April 2022.

Indemnification Obligations

The Company is subject to certain indemnification obligations to both present and former officers and directors, including Mr. Collier, in respect to the legal proceedings described above. These indemnification obligations will be subject to limitations prescribed by law and the articles of the Company, and may also be subject to contractual limitations.

1.2.3 At-The-Market Offering Agreement

The Company has an At-the-Market Offering Agreement (the "**ATM Agreement**") with H.C. Wainwright & Co. (the "Agent"), which it entered into in June 2021, whereby the Company, at its sole discretion and from time-to-time during the term of the ATM Agreement, can sell common shares, through the Agent, as sales agent (the "**ATM Facility**"). The amount available under the ATM Facility is currently US\$13.8 million as the Company sold 1,212,805 common shares at an average share price of US\$0.567 for gross proceeds of approximately US\$0.69 million (\$0.87 million) in September 2021 (more fully described in the 2021 Annual MD&A), and which to date of this MD&A are the only sales under the ATM Facility.

Pursuant the ATM Agreement, sales of the common shares are to be made in "at the market distributions", as defined in National Instrument 44-102, directly on the NYSE American stock exchange or on any other existing trading market in the United States. No offers or sales of Common Shares will be made under the ATM Facility in Canada on the Toronto Stock Exchange or other trading markets in Canada.

Under the ATM Facility, the Company will determine, at its sole discretion, the date, price and number of common shares to be sold. The common shares will be distributed at market prices or prices related to prevailing market prices from time to time. The Company is not required to sell any common shares at any time during the term of the ATM Facility, and there are no fees for having established the ATM Facility. The ATM Agreement does not restrict the Company from conducting other financings. The Company will pay the Agent a placement fee for common shares sold under the ATM Agreement and will reimburse certain expenses of the Agent.

The Company intends to use the net proceeds from the ATM Facility at the discretion of the Company, for (i) the appeal of the ROD by the USACE, (ii) continued engineering, environmental, permitting and evaluation work on the Pebble Project, (iii) maintenance of Company's corporate presence in Alaska, (iv) maintenance of the Pebble Project mineral claims, (v) pursuit of the partnering process for the Pebble Project, (vi) preparation of engineering reports on the Pebble Project, and (vii) general corporate purposes.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

1.2.4 Use of Proceeds

On July 15, 2020, Northern Dynasty completed a bought deal offering ("**July 2020 Offering**") of 24,150,000 common shares of the Company at a price of US\$1.46 per share for gross proceeds of approximately US\$35.26 million. The offering was completed pursuant to an underwriting agreement dated July 10, 2020, among the Company and Cantor Fitzgerald Canada Corporation, as lead underwriter and bookrunner, and a syndicate of underwriters including BMO Nesbitt Burns Inc., Canaccord Genuity Corp, H.C. Wainwright & Co., LLC, Paradigm Capital Inc., TD Securities Inc., Roth Capital Partners, LLC and Velocity Trade Capital Ltd. (collectively, the "**July 2020 Underwriters**"). The July 2020 Underwriters were paid a 5% cash commission.

The July 2020 Offering was completed by way of a prospectus supplement to the Company's existing Canadian base shelf prospectus and related U.S. registration statement on Form F-10 (SEC File No. 333-238933).

On July 30, 2020, and August 6, 2020, Northern Dynasty completed two tranches of a non-brokered private placement (outside of the United States) of 5,807,534 common shares and 100,000 common shares, respectively, at US\$1.46 per share for gross proceeds of US\$8.6 million. The shares issued pursuant to the private placement were subject to applicable resale restrictions, including a four-month hold period under Canadian securities legislation.

The following table sets out a comparison of the Company's disclosed expected use of net proceeds from the July 2020 Offerings to the actual use of net proceeds as at March 31, 2022. The net proceeds were used to advance the Company's business objectives and milestones as follows:

Intended Use of Net Proceeds of 2020 Offerings	Actual Use of Net Proceeds from 2020 Offerings	Variance – (Over)/Under Expenditure	Explanation of Variance and impact on business objectives	
Ongoing work with Alaska and federal regulatory agencies in support of the issuance of the EIS and the Record of Decision for the Pebble Project	US\$1,000,000	US\$–	US\$1,000,000	Expenses yet to be incurred.
Maintain an active corporate presence in Alaska by continuing to build relationships with both federal and Alaska state governments and agencies and Native Corporations and communities in connection with advancement of the Pebble Project	US\$4,515,231	US\$4,515,231	–	NA
Commence the Alaska state permitting process for the Pebble Project, contingent upon issuance of a positive EIS and Record of Decision for the Pebble Project and management determinations as to timing	US\$17,750,000	US\$–	US\$17,750,000	State permitting has not yet been initiated and is pending appeal of the ROD denial. Funds allocated to general corporate purposes below.
Maintenance of the Pebble claims in good standing.	US\$1,400,000	US\$1,400,000	–	NA

1.2.5 Market Trends

Copper prices in 2017 were variable to improving, resulting in an increase in the average annual price. Prices were variable in early 2018, trended downward from June to August, then improved through to the end of the year and into 2019. Prices decreased in April/May of 2019 and were slightly variable through September, when they increased, then remained stable until late January 2020 when they dropped sharply, losing the gain made in late 2019. In March 2020, prices dropped sharply in response to changing economic conditions related to COVID-19 but rebounded in May and trended upward during the third quarter. Prices dropped slightly in October 2020, then increased by the end of the year. In 2021, prices were variable to improving through to May, dropped in June and then were stable until October when they again began to show some variability. Copper prices had been increasing in 2022 but have decreased since late April. The closing price on May 12, 2022 was US\$4.09/lb.

Gold prices were variable to increasing during most of 2017, but then dropped late in the year. After rebounding in January 2018, prices were relatively stable for several months in 2018, but decreased in the third quarter. Prices increased in the latter part of 2018 and through most of 2019 before stabilizing from September to December 2019. Gold prices increased from January to March 2020, when they dropped sharply, and then resumed the upward trend in response to uncertainty about global economic conditions related to COVID-19. Prices reached record highs in late July and early August 2020, then decreased before stabilizing for the remainder of the year. Prices were variable in 2021, and began to increase in October. Prices had been increasing in 2022 but have been variable since early March. The closing price on May 11, 2022 was US\$1,852/oz.

Molybdenum prices increased in 2017 and through most of 2018, and were steady from September to December 2018. Prices had varied only slightly in 2019, before dropping from October through to mid-January 2020. Molybdenum prices decreased for the most part in 2020 but began to increase in August 2020, and continued to do so to July 2021, the dropped slightly and have been relatively stable since August 2021. On May 12, 2022, the closing price was US\$19.05/lb.

Silver prices were variable, then declined in late 2017. Prices recovered in January 2018, but were variable the rest of 2018. Prices were variable in 2019, but stabilized in November and December and the annual average

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

price increased in 2019. After increasing in early January 2020, silver prices fell to US\$12.00/oz in March 2020, then began to increase in response to uncertainty about global economic conditions related to COVID-19, reaching over US\$27.00/oz in mid-August, then decreased for a time, and increased for the remainder of the year, resulting in an increase in the average annual price in 2020. Silver prices were variable in 2021 but the average annual price increased. Prices in 2022 have been variable and decreased in late April. On May 11, 2022, the closing price was US\$21.78/oz.

Average annual prices of copper, gold, molybdenum and silver for the past five years as well as the average prices so far in 2022 are shown in the table below:

Year	Average metal price ^{1,2}			
	Copper US\$/lb	Gold US\$/oz	Molybdenum US\$/lb	Silver US\$/oz
2017	3.22	1,272	7.26	16.49
2018	2.96	1,269	11.94	15.71
2019	2.72	1,393	11.36	16.21
2020	2.80	1,769	8.68	20.54
2021	4.27	1,799	15.94	25.14
2022 (to May 11/12, 2022)	4.52	1,889	19.12	23.99

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

Discussion of Quarterly Trends

Exploration and evaluation expenses ("**E&E**") has fluctuated depending on activities undertaken. In 2020, the Company continued its efforts in support of the EIS process to advance the final EIS which was received, and worked on the LEDPA and the CMP. In Q1 2021, the Company focused on the review of the USACE ROD and the submission of an administrative appeal thereof. In Q2 to Q4 2021, the Company completed engineering work to finalize the 2021 preliminary economic assessment for the Pebble Project. In Q3 2021, the Company also completed a summer field program. In Q1 2022, the Company focused on the review and issue of the study on the economic contribution assessment of the proposed Pebble Project, as well as advancing the summer field program. Further details are discussed in Section [1.2.1.2 Technical Programs](#). E&E also includes costs for Native community engagement, site leases, land access agreements and annual claim fees.

General and administrative expenses ("**G&A**") in 2021 were lower than 2020 as in 2020 there were consulting fees relating to financing activities undertaken and payments of bonuses including discretionary performance based bonuses paid to the former Pebble Partnership CEO ("**PLP CEO**") (Q2 and Q3 2020).

Legal, accounting and audit expenses have fluctuated in response to legal fees incurred in relation to class action lawsuits in both years and for the preparation and response to the grand jury investigation in 2021. In Q4 2021 and Q1 2022, the Company received insurance proceeds for certain of the costs incurred.

Share-based compensation expense ("**SBC**") has fluctuated due to timing (affects the estimate of fair value determined) of share purchase option ("**option**") grants, the quantum of option grants and the vesting periods associated with these option grants. The Company granted 6,783,000 in Q3 2020. No option grants were issued in 2021 and in Q1 2022.

1.5 Results of Operations

The following financial data has been prepared from the Financial Statements, and is expressed in *thousands* of Canadian dollars unless otherwise stated.

The Company's operations and business are not driven by seasonal trends, but rather are driven towards the achievement of project milestones relating to the Pebble Project such as the achievement of various technical, environmental, socio-economic and legal objectives, including obtaining the necessary permits, the completion of pre-feasibility and final feasibility studies, preparation of engineering designs, as well as receipt of financings to fund these objectives along with mine construction.

1.5.1 Results of Operations – Three Months ended March 31, 2022 versus 2021

For the three months ended March 31, 2022, the Company recorded a \$5.0 million decrease in net loss as loss from operating activities decreased by \$4.9 million due to a \$1.3 million decrease in SBC and a \$2.2 million decrease in legal, accounting and audit expenses.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

Exploration and evaluation expenses

The breakdown of E&E (in thousands of dollars) for the period as compared to 2021 is as follows:

E&E	Three months	
	2022	2021
Engineering	\$ 948	\$ 1,109
Environmental	537	829
Site activities	282	466
Socio-economic	517	827
Transportation	–	15
Other activities and travel	17	40
Total	\$ 2,301	\$ 3,286

E&E decreased by \$1 million in the current quarter due largely to a decrease in environmental and socio-economic related activities. In Q1 2021, the Company focused on developing the RFA, which was submitted to and accepted by the USACE, and responded to requests for information as the USACE considered the merits of the appeal.

General and administrative expenses

The following table (in thousands of dollars) provides a breakdown of G&A, and also includes legal, accounting and audit expenses incurred, in the period as compared to 2021:

	Three months	
	2022	2021
Conference and travel	\$ 50	\$ 26
Consulting	149	279
Depreciation of right-of-use assets	25	55
Insurance	525	269
Office costs, including information technology	175	204
Management and administration	755	1,189
Shareholder communication	219	230
Trust and filing	195	210
Total G&A	2,093	2,462
Legal, accounting and audit	84	2,287
	\$ 2,177	\$ 4,749

G&A in the current quarter decreased by \$0.4 million due to decreases in management and administration and consulting costs which was offset by an increase in insurance costs.

Legal, accounting and audit expenses decreased by \$2.2 million in the current quarter. In Q1 2021 legal expenses were higher due to new class action lawsuits and the preparation for the grand jury investigation. As well the Company received insurance proceeds for costs incurred of \$0.7 million in Q1 2022 as compared to \$0.5 million in Q1 2021.

Other

The Company recognized a decrease in SBC of \$1.3 million in the quarter. SBC fluctuates due to the timing of when options, RSUs and DSUs are granted, as well as the quantum thereof, and the vesting periods associated with these grants. SBC in Q1 2022 relates to the issue of RSUs as there were no grants in 2021, and all options were fully vested at the end of Q3 2021.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

1.5.2 Financial position as at March 31, 2022 versus December 31, 2021

The total assets of the Company decreased by \$6.3 million due largely to the decrease in cash and cash equivalents as the Company used cash to fund its operations, and the decrease in the carrying value of the Company's mineral property, plant and equipment as a result of the appreciation of the Canadian dollar in relation to US dollar.

1.5.3 Plan of Operations

Our business objectives for 2022 are to:

- continue with the appeal of the ROD by the USACE;
- continue with engineering, environmental, permitting and evaluation work on the Pebble Project as required;
- maintain an active corporate presence in Alaska to advance relationships with political and regulatory offices of government (both in Alaska and Washington, D.C.), Alaska Native partners and broader stakeholder relationships;
- contingent on a successful appeal of the RFA, initiate Alaska state permitting activities;
- maintain the Pebble Project and Pebble claims in good standing;
- continue to seek potential partner(s) with greater financial resources to further advance the Pebble Project; and
- continue general and administrative activities in connection with the advancement of the Pebble Project.

The key milestones in the development of the Company's business is presently the successful completion of an appeal of the ROD.

The USACE's ROD has had a material impact on the Company's previously disclosed plan of operations. Accordingly, the Company has altered its intended business activities and milestones to be completed over the next 12 months to focus on the appeal of the ROD. The Company's present business objectives and milestones are anticipated to generally include the following activities over the next 12 months:

Milestone/Business Objective	Business Activity within Next 12 Months	Timeframe for Completion ¹	Anticipated Budget during Next 12 Months
Continue with engineering, environmental, permitting and evaluation work on the Pebble Project as required	Work includes ongoing site maintenance to remain in compliance with permitting and demobilization of field equipment as required, additional engineering and evaluation of the Pebble Project	Ongoing through next twelve months	US\$3,176,000
Maintain an active corporate presence in Alaska	Continue to build relationships with: <ul style="list-style-type: none"> • both federal and Alaska state governments and agencies; • Native Corporations and communities, an example being the establishment of the Pebble Performance Dividend, which is intended to provide a direct benefit to the people of Bristol Bay; • Right-of-Way Payments to various Native Corporations 	Ongoing through next twelve months	US\$3,717,000

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

Milestone/Business Objective	Business Activity within Next 12 Months	Timeframe for Completion ¹	Anticipated Budget during Next 12 Months
Pebble claims maintenance	Continue to maintain the Pebble claims in good standing.	Ongoing through next twelve months	US\$935,000
Pebble partnering process ¹	Ongoing discussions and possible negotiations to secure a project partner(s) with the financial resources to advance development of the Pebble project. Management will continue to seek suitable partner(s) with the objective to maximize shareholder value through 2022. ²	Ongoing through next twelve months	US\$1,000,000
General corporate purposes, including appeal of the ROD by the USACE on Pebble, defence of Class Action Lawsuits, settlement of historical liabilities, handling of grand jury investigation	Pursue successful appeal of the ROD and defense of legal proceedings	Ongoing through next twelve months	US\$7,929,000

Notes

1. Due to the COVID-19 pandemic, some due diligence activities that a partner may usually undertake such as site visits have been slower than anticipated.
2. There is no assurance that these discussions or possible negotiations will result in any binding agreement with any partner for the development of the Pebble Project. See [1.15.5 Risk Factors](#).

The Company's actual plan of operations and expenditures for the next twelve months may vary depending on future developments and at the discretion of the Company's board of directors and management.

The Company will require additional financing beyond its current cash and working capital in order to carry out these further business activities. The Company believes that its ability to obtain additional financing has been and will continue to be negatively impacted by the Record of Decision and its ability to successfully appeal the ROD. Other than the ATM Facility, the Company does not have any arrangement in place for any future financing, and there is no assurance that the Company will be able to achieve the required additional financing when required. In addition, the Company cautions that while a successful appeal of the ROD will reduce one of the significant risk factors faced by the Pebble Project, significant risk factors will remain for the development of the Pebble Project, as described in [1.15.5 Risk Factors](#).

In the event that appeal of the ROD is unsuccessful, the Company will be required to re-assess its options for advancing the development of the Pebble Project. These options may include a re-assessment of the scope of the Pebble Project and the submission of a revised permit application. While the Company is unable to assess the full impact of any adverse appellate result of the ROD at this time, the Company anticipates that such a negative result on appeal of the ROD will have a negative impact on the Company's ability to achieve additional financing, and will most likely limit the Company's financing options to further issuances of the Company's equity securities.

The Company may also attempt to reduce the amount of additional financing required by entering into a potential joint venture or other partnership arrangement for advancement of the Pebble Project. The Company is continuing to evaluate the availability of long-term project financing options among mining companies, private equity firms and others, utilizing conventional asset level financing, debt, royalty and alternative

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

financing options. There is no assurance that Northern Dynasty will be able to partner the Pebble Project or secure additional financing when required.

To the extent that Northern Dynasty is unable to raise additional financing, it will have to curtail its operational activities, which will ultimately delay advancement of the Pebble Project.

Northern Dynasty's inability to successfully appeal the ROD may ultimately mean that it will be unable to proceed with the development of the Pebble Project as currently envisioned or at all.

1.6 Liquidity

The Company's major sources of funding have been the issuance of equity securities for cash, primarily through private placements and prospectus offerings to sophisticated investors and institutions, and proceeds pursuant to the exercise of options and warrants. The Company's access to financing is always uncertain. There can be no assurance of continued access to equity funding.

As at March 31, 2022, the Company had cash and cash equivalents of \$17.9 million, a decrease of \$4.4 million from December 31, 2021. The Company employed \$4.3 million in its operating activities in the three months ended March 31, 2022. The Company has prioritized the allocation of its available financial resources to meet key corporate and Pebble Project expenditure requirements in the near term, being the next 12 months, as outlined above under [1.5.3 Plan of Operations](#). Other than the ATM Facility, the Company does not have any arrangement in place for any future financing. There can be no assurances that the Company will be successful in obtaining additional financing when required. If the Company is unable to raise the necessary capital resources to meet obligations as they come due, the Company will have to reduce or curtail its operations at some point.

At March 31, 2022, the Company had a working capital of \$17.3 million as compared to a working capital of \$21.7 million at December 31, 2021. The Company has no lease or any other long-term obligations other than those disclosed below:

The following commitments and payables (expressed in *thousands*) existed at March 31, 2022:

	Payments due by period as of the reporting date			
	Total	≤ 1 year	1-5 years	> 5 years
Trade and other payables ¹	\$ 2,206	\$ 1,411	\$ 795	\$ –
Payables to related parties	508	508	–	–
Lease commitments ²	869	186	518	165
Other commitments ³	420	107	313	–
Total	\$ 4,003	\$ 2,212	\$ 1,626	\$ 165

Notes to table

1. Includes US\$635 payable on completion of a partnering transaction.
2. Relates to the undiscounted lease payments to be made by the Company over the remaining lease terms.
3. Includes payments due on a short term lease and payments for the use of offices and shared space from a related party.
4. US dollar amounts have been converted at the closing rate on March 31, 2022, of \$1.2507 per US dollar.

The Company has no "Purchase Obligations", defined as any agreement to purchase goods or services that is enforceable and legally binding on the Company that specifies all significant terms, including fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. The Company is responsible for maintenance payments on the Pebble Project claims and payment of annual toll payments and fees pursuant to the right of way agreements (see [Right-of-Way Agreements](#) under

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

Section [1.2.1.1 Project Background and Status](#)). In addition, the Company has payments relating to routine site and office leases, which is included in the table above.

1.7 Capital Resources

The Company's capital resources consist of its cash reserves, which include its cash and equivalents. As at March 31, 2022, other than noted in [1.6 Liquidity](#), the Company has no other long-term debt and no commitments for material capital expenditures.

The Company has no lines of credit or other sources of financing.

1.8 Off-Balance Sheet Arrangements

As at March 31, 2022, the Company had no off-balance sheet arrangements.

1.9 Transactions with Related Parties

Transactions with Hunter Dickinson Services Inc. ("HDSI")

Hunter Dickinson Inc. ("HDI") and its wholly owned subsidiary, HDSI are private companies established by a group of mining professionals engaged in advancing and developing mineral properties for a number of private and publicly-listed exploration companies, one of which is the Company.

Current directors of the Company, namely Robert Dickinson and Ron Thiessen, Board Chair and Chief Executive Officer ("CEO"), respectively, are active members of the HDI Board of Directors. Mark Peters, the Company's Chief Financial Officer ("CFO"), is also the CFO of HDSI. Other key management personnel of the Company – Adam Chodos, Stephen Hodgson¹⁶, Bruce Jenkins, Trevor Thomas and Mike Westerlund – are active members of HDI's senior management team.

The business purpose of the related party relationship

HDSI provides technical, geological, corporate communications, regulatory compliance, administrative and management services to the Company, on an as-needed and as-requested basis from the Company.

HDSI also incurs third party costs on behalf of the Company. Such third party costs include, for example, directors and officers insurance, travel, conferences, and technology services.

As a result of this relationship with HDSI, the Company has ready access to a range of diverse and specialized expertise on a regular basis, without having to engage or hire full-time experts. The Company benefits from the economies of scale created by HDSI.

The measurement basis used

The Company procures services from HDSI pursuant to an agreement (the "**Services Agreement**") dated July 2, 2010, whereby HDSI agreed to provide technical, geological, corporate communications, administrative and management services to the Company. A copy of the Services Agreement is publicly available under the Company's profile at www.sedar.com.

¹⁶ Stephen Hodgson has been the Vice President Engineering for the Company since 2005. In July 2018, he was transferred to a subsidiary of HDSI, Hunter Dickinson Servicepay (US) Inc., and provided services to the Pebble Partnership as Senior Vice President, Engineering & Project Director until the end of February 2021 when he was transferred back to HDSI, and continues to act as the Vice President, Engineering for the Company.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

Services from HDSI are provided on a non-exclusive basis as required and as requested by the Company. The Company is not obligated to acquire any minimum amount of services from HDSI. The fees for services is determined based on an agreed upon charge-out rate for each employee performing the service and the time spent by the employee. The charge-out rate also includes overhead costs such as office rent, information technology services and administrative support. Such charge-out rates are agreed and set annually in advance.

Third party expenses are billed at cost, without any markup.

Ongoing contractual or other commitments resulting from the related party relationship

Other than noted below, there are no ongoing contractual or other commitments resulting from the Company's transactions with HDSI, other than the payment for services already rendered and billed. The agreement may be terminated upon 60 days' notice from either party.

In an addendum to the Services Agreement between HDSI and the Company, dated October 10, 2015, following a change of control, the Company is subject to termination payments if the Services Agreement is terminated. The Company will be required to pay HDSI \$2.8 million, and an aggregate amount equal to six months of annual salaries payable to certain individual service providers under the Services Agreement and their respective employment agreements with HDSI.

The Company has an office use agreement with HDSI, whereby HDSI is providing two offices and a non-fixed space, on as needed basis, for a five-year term, which commenced May 1, 2021, and ends April 29, 2026. Pursuant to this agreement, the Company has a remaining undiscounted commitment of \$0.4 million, which has been disclosed in the table under section [1.6 Liquidity](#). The commitment is a flow through cost at market rates.

Transactions during the Reporting Period and Balances with HDSI at the end of the Reporting Period

Disclosure as to transactions with HDSI and any amounts due to or from HDSI is provided in Note 7 in the notes to the Financial Statements which accompany this MD&A and which are available under the Company's profile at www.sedar.com.

Key Management Personnel

The required disclosure for the remuneration of the Company's key management personnel is provided in Note 7 in the notes to the Financial Statements which accompany this MD&A and which are available under the Company's profile at www.sedar.com.

1.10 Fourth Quarter

Not applicable

1.11 Proposed Transactions

There are no proposed asset or business acquisitions or dispositions, other than those in the ordinary course, before the Board of Directors for consideration.

1.12 Critical Accounting Estimates

The required disclosure is provided in Note 2 in the notes to the Financial Statements which accompany this MD&A and which are available under the Company's profile at www.sedar.com.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

1.13 Changes in Accounting Policies including Initial Adoption

The required disclosure is provided in Note 2 in the notes to the Financial Statements which accompany this MD&A and which are available under the Company's profile at www.sedar.com.

1.14 Financial Instruments and Other Instruments

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit Risk

Credit risk is the risk of potential loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets, including cash and cash equivalents and restricted cash and amounts receivable. The Company limits the exposure to credit risk by only investing with high-credit quality financial institutions in business and saving accounts, guaranteed investment certificates, government treasury bills, low risk corporate bonds and money market funds, which are available on demand by the Company as and when required or mature in timeframes appropriate to the needs of the Company. There has been no change in the Company's objectives and policies for managing this risk except for changes in the carrying amounts of financial assets exposed to credit risk, and there was no significant change to the Company's exposure to credit risk during the year ended December 31, 2021. Amounts receivable include receivable balances with government agencies, prepaid expenses and refundable deposits. Management has concluded that there is no objective evidence of impairment to the Company's amounts receivable.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations when they become due. There has been no change in the Company's objectives and policies for managing this risk. The Company's liquidity position is discussed further in Section [1.6 Liquidity](#).

Foreign Exchange Risk

The Company is subject to both currency transaction risk and currency translation risk: Group entities, the Pebble Partnership, Pebble Services Inc. and U5 Resources Inc., have the US dollar as functional currency; and certain of the Company's corporate expenses are incurred in US dollars. The fluctuation of the US dollar in relation to the Canadian dollar has an impact upon the losses incurred by the Company as well as the value of the Company's assets as the Company's functional and presentation currency is the Canadian dollar. The Company has not entered into any agreements or purchased any instruments to hedge possible currency risks at this time.

There has been no change in the Company's objectives and policies for managing this risk, except for the changes in the carrying amounts of the financial assets exposed to foreign exchange risk. The Company's exposure to foreign exchange risk is as follows:

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

US dollar denominated financial assets and liabilities (in thousands of Canadian Dollars)	March 31 2022	December 31 2021
Financial assets:		
Amounts receivable	\$ 155	\$ 168
Cash and cash equivalents and restricted cash	3,526	5,433
	3,681	5,601
Financial liabilities:		
Non-current trade payables	(1,319)	(1,365)
Payables to related parties	(134)	(190)
Current trade and other payables	(1,066)	(1,670)
	(2,519)	(3,225)
Net financial assets exposed to foreign currency risk	\$ 1,162	\$ 2,376

Based on the above net exposures and assuming that all other variables remain constant, a 10% change in the value of the Canadian dollar relative to the US dollar would result in a gain or loss of \$116 (December 31, 2021 – \$238) in the reported period. This sensitivity analysis includes only outstanding foreign currency denominated monetary items.

Interest rate risk

The Company is subject to interest rate risk with respect to its investments in cash and cash equivalents. There has been no change in the Company's objectives and policies for managing this risk and no significant change to the Company's exposure to interest rate risk during the three months ended March 31, 2022.

Commodity price risk

While the value of the Company's Pebble Project is related to the prices of copper, gold, molybdenum, silver and rhenium and the outlook for these minerals, the Company currently does not have any operating mines and hence does not have any hedging or other commodity based risks in respect of its operational activities.

Copper, gold, molybdenum, silver and rhenium prices have fluctuated widely historically and are affected by numerous factors outside of the Company's control, including, but not limited to, industrial and retail demand, central bank lending, forward sales by producers and speculators, levels of worldwide production, short-term changes in supply and demand because of speculative hedging activities, and certain other factors related specifically to gold.

Capital Management

The Company's policy is to maintain a strong capital base to maintain investor and creditor confidence and to sustain future development of the business. The capital structure of the Company currently consists of equity, comprising share capital and reserves, net of accumulated deficit.

There were no changes in the Company's approach to capital management during the period. The Company is not subject to any externally imposed capital requirements.

1.15 Other MD&A Requirements

Additional information relating to the Company, including the Company's 2021 AIF, is available under the Company's profile on SEDAR at www.sedar.com.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

1.15.1 Disclosure of Outstanding Share Data

The capital structure of the Company as of May 13, 2022, is as follows:

	Number
Common shares issued and outstanding	529,779,388
Share options pursuant to the Company's incentive plan	20,825,500
Deferred share units	503,430
Non-incentive plan options ¹	94,000

Note to table:

1. These were issued on the acquisition of Cannon Point in October 2015.

1.15.2 Disclosure Controls and Procedures

The Company has disclosure controls and procedures in place to provide reasonable assurance that any information required to be disclosed by the Company under securities legislation is recorded, processed, summarized and reported within the applicable time periods and that required information is accumulated and communicated to the Company's management so that decisions can be made about the timely disclosure of that information.

1.15.3 Management's Report on Internal Control over Financial Reporting ("ICFR")

The Company's management, including the CEO and the CFO, is responsible for establishing and maintaining adequate ICFR. ICFR is a process designed by, or under the supervision of, the CEO and CFO and effected by the Company's Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with IFRS. The Company's ICFR includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the consolidated financial statements.

There has been no change in the design of the Company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the Company's ICFR during the period covered by this MD&A.

1.15.4 Limitations of Controls and Procedures

The Company's management, including its CEO and CFO, believe that any system of disclosure controls and procedures or ICFR, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Furthermore, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, they cannot provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been prevented or detected. These inherent limitations include the realities that judgments in decision-making can be faulty and breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

individual acts of some persons, by collusion of two or more people, or by unauthorized override of controls. The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Accordingly, because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected.

1.15.5 Risk Factors

The securities of Northern Dynasty are highly speculative and subject to a number of risks. A prospective investor or other person reviewing Northern Dynasty for a prospective investor should not consider an investment in Northern Dynasty unless the investor is capable of sustaining an economic loss of their entire investment. The risks associated with Northern Dynasty's business include:

Northern Dynasty May be Unsuccessful in Appealing the Record of Decision and may ultimately not be able to Obtain the Required Environmental Permits for the Pebble Project.

The USACE's ROD issued on November 25, 2020, has denied Northern Dynasty's environmental permit for development of the Pebble Project under the CWA. This environmental permit is required for Northern Dynasty to proceed with the development of the Pebble Project. While the Pebble Partnership is appealing the ROD, there is no assurance that the appeal of the ROD will be successful. Even if the appeal is successful, there is no assurance that a positive ROD will ultimately be obtained by the Pebble Partnership or that the required environmental permit will be obtained. An inability to successfully appeal the ROD will mean that Northern Dynasty cannot proceed with the development of the Pebble Project as presently envisioned. There is no assurance that Northern Dynasty will be able to redesign the Pebble Project in a manner that addresses the "significant degradation" finding reached by the USACE or ultimately develop any compensatory mitigation plan that the USACE accepts as appropriately addressing the "significant degradation" determination or that will change the USACE's position that environmental permitting of the Pebble Project under the CWA is against the public interest. Northern Dynasty's inability to address these issues may mean that the Company is ultimately not able to secure the environmental permits that are required to develop the Pebble Project. Accordingly, there is no assurance that Northern Dynasty will ever be able to proceed with the development of the Pebble Project and that investors will be able to recover their investment in the Company.

In addition, the EPA has re-initiated the CWA Section 404(c) process, and has announced its intent to issue a revised Proposed Determination for the waters of Bristol Bay. Such EPA activity could negatively affect the ability of the Pebble Partnership to obtain required permitting and develop the Project, even if the appeal of the 2020 ROD is successful.

Inability to Ultimately Achieve Mine Permitting and Build a Mine at the Pebble Project.

The Company may ultimately be unable to secure the necessary permits under United States federal and Alaskan State laws to build and operate a mine at the Pebble Project. There is no assurance that the EPA will not seek to undertake future regulatory action to impede or restrict the Pebble Project. In addition, there are prominent and well-organized opponents of the Pebble Project and the Company may be unable, even if it presents solid scientific and technical evidence of risk mitigation, to overcome such opposition and convince governmental authorities that a mine should be permitted at the Pebble Project. The Company faces not only the permitting and regulatory issues typical of companies seeking to build a mine, but additional public and regulatory scrutiny due to its location and potential size. Accordingly, there is no assurance that the Company will obtain the required permits.

The Company through the Pebble Partnership filed a CWA 404 permit application with the USACE, which triggered an EIS process under NEPA and ultimately resulted in the issuance by the USACE of the ROD. As discussed in this MD&A and in our 2021 AIF, 2021 Annual MD&A, the Company's permit application has been denied by the USACE and there is no assurance that the Company will be able to successfully appeal this decision or ultimately be able to advance with development of a mine at the Pebble Project. The uncertainty of

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

the USACE appeal process casts doubt as to whether the Company will ever be able to obtain these permits for the Pebble Project as currently planned or within the timeline envisioned. If the Company is ultimately able to secure all permits required to begin construction, a number of additional years would be required to finance and build a mine and commence operations and there is no certainty as to this time frame. During these periods, the Company would likely have no income and will accordingly require additional financing to continue its operations. There is no assurance that this financing will be available to the Company. Unless and until the Company builds a mine at the Pebble Project, it will be unable to achieve revenues from operations and may not be able to sell or otherwise recover its investment in the Pebble Project, which would have a material adverse effect on the Company and an investment in the Company's common shares.

The Current Mine Plan for the Pebble Project in the 2021 PEA is Not Supported by Any Preliminary or Final Feasibility Study.

The current mine plan that is included in the Project Description for the development of the Pebble Project is supported by the 2021 PEA but is not supported by any preliminary or final feasibility study. Accordingly, there is a substantial risk that the Company will not be able to proceed with the development of the Pebble Project, that the Pebble Project cannot be economically mined or that shareholders may not be able to recover their investment in the Company. The 2021 PEA is preliminary in nature and includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves. There is no certainty that the 2021 PEA results will be realized. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability, and there is no assurance that the Pebble Project mineral resources will ever be upgraded to mineral reserves. The 2021 PEA assumes that the Proposed Project will ultimately be able to obtain the required permits from the USACE and state of Alaska authorities to enable development of the Proposed Project, however there is no assurance that these permits will be obtained. Neither the 2021 PEA, nor the mineral resource estimates on which the 2021 PEA is based, have been adjusted for any risks that (i) the Pebble Partnership may not be able to successfully appeal the record of decision issued by the USACE on November 25, 2020 denying the granting of the required permit under the CWA, or (ii) any action that may be taken by the EPA in order to reinstate the process of a CWA Section 404(c) determination for the waters of the Bristol Bay, each of which could adversely impact the ability of the Proposed Project to proceed. In addition, the 2021 PEA does not account for any additional capital or operating costs that may be necessary to obtain the required federal or state permits, should adjustments to the operating or environmental mitigation plans be required to be made in order to secure the required permits. In addition, recent inflationary pressures may adversely impact estimated capital and operating costs in the PEA. Further, the net present value calculations in the PEA are based on assumed discount rates which may not account for future increases in interest rates. For these reasons, there is significant risk that the economics for the Pebble Project indicated in the PEA, including production forecasts, capital costs, operating costs, revenues from operations, net present values and internal rates of return, will not be achieved should the Pebble Project be developed. The 2021 PEA should be viewed in this context and should not be considered a substitute for a preliminary or final feasibility study.

The IHS Markit report on the economic contribution assessment of the Pebble Project is based on the production scenarios and related assumptions presented in the 2021 PEA. Any changes to the production scenarios outlined in the 2021 PEA as a result of these factors could have a material impact on the projections implied by the IHS Markit report. Accordingly, there is no assurance that contributions and benefits implied by the economic contribution assessment report will be realized.

If Northern Dynasty is Unable to Defend the Proposed Class Action Lawsuits against it, there is No Assurance that Northern Dynasty will not be Subject to Judgements for Damages against it.

Northern Dynasty is the subject of proposed class action lawsuits against it that assert liability against Northern Dynasty on behalf of a purported class of shareholders under securities laws, both in Canada and in the United States. While Northern Dynasty intends to vigorously defend these claims, there is no assurance that Northern Dynasty will be successful in defending all claims made against it. Should Northern Dynasty not be successful in defending these claims, it may be subject to judgements against it and be required to pay substantial amounts

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

in damages to the plaintiffs under these judgements. These damages could result in a material and adverse impairment to Northern Dynasty's financial condition and capital resources, and may further impair its ability to pursue the development of the Pebble Project.

In addition, Northern Dynasty is required under the terms of the indemnification agreements that it has entered into with underwriters in connection with Northern Dynasty's public financings to indemnify the underwriters for any losses that they incur. As certain of Northern Dynasty's underwriters have been named as defendants in certain of these class action lawsuits, Northern Dynasty may be required to indemnify and pay monies to the underwriters for any losses that they suffer and expenses that they incur. In addition, Northern Dynasty may be required to indemnify certain of its officers and directors for any losses that they suffer or expenses that they incur.

There is no assurance that Northern Dynasty's existing insurance policies will respond and be sufficient to cover any amounts that it may be required to pay to the plaintiffs in these class action lawsuits, or the underwriters under our indemnification obligations. We may also be required to indemnify certain of our officers and directors who have been named as party to these lawsuits. These damages could result in a material and adverse impairment to our financial condition and capital resources, and may further impair our ability to raise additional financing and pursue the development of the Pebble Project.

Grand Jury Investigation and Related Matters.

The Company is cooperating with a grand jury investigation involving the United States Attorney's Office for the District of Alaska, and an SEC inquiry, as described above under [1.2.2 Legal Matters](#). The Company is not able to provide investors with guidance as to the outcome of the grand jury investigation or SEC inquiry, or whether either of them will result in any charges or other claims against the Company, the Pebble Partnership or their associated individuals. The Company does anticipate, however, that it will incur substantial expenses in connection with the grand jury and SEC matters, including legal fees and expenses related to the collection, review, and production of documents, among other things. Any adverse civil or criminal proceedings could have a material adverse impact on Northern Dynasty's prospects and ability to advance development of the Pebble Mine project.

In addition, Northern Dynasty and the Pebble Partnership may face ongoing and further inquiries, demands or allegations concerning future plans for the Pebble Project from the U.S. Congress' House Committee on Transportation and Infrastructure. Again, any adverse civil or criminal proceedings relating to the Committee's investigation could have a material adverse impact on Northern Dynasty's prospects and ability to advance development of the Pebble Project. In addition, these inquiries or any possible resulting civil or criminal proceedings could erode any existing political support for the Pebble Project, which may reduce the likelihood of the Pebble Project obtaining the required environmental permitting.

The Record of Decision has had an Ongoing Adverse Impact on Northern Dynasty's Ability to Finance the Pebble Project.

Northern Dynasty believes that the USACE's ROD has had a material adverse impact on its ability to finance its operations and will continue to adversely impact its financing options for so long as the ROD remains outstanding. Appealing the ROD in any future litigation will require a substantial amount of our current cash and financial resources. As Northern Dynasty does not have any revenues, and does not anticipate revenues in the foreseeable future, Northern Dynasty will require additional financing to continue its operations. If Northern Dynasty is unsuccessful in its appeal of the ROD, Northern Dynasty's financing options may be substantially limited and it may not be able to generate the necessary financing to enable continued operations without a substantial reduction or restructuring of the Pebble Project. The Company's inability to secure this additional required financing will negatively impact the ability of shareholders to recover their investment in the Company.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

Risks Associated with the Novel Coronavirus ("COVID-19").

The current outbreak of COVID-19, and any future emergence and spread of similar pathogens, could have a material adverse effect on global and local economic and business conditions, which may adversely impact Northern Dynasty's business and results of operations and the operations of contractors and service providers. The extent to which the COVID-19 impacts our operations will depend on future developments, which are highly uncertain and cannot be predicted with confidence, including the duration of the outbreak, new information that may emerge concerning its severity and the actions taken to contain the virus or treat its impact, among others. The adverse effects on the economy, the stock market and Northern Dynasty's share price could adversely impact its ability to raise capital, with the result that our ability to pursue development of the Pebble Project could be adversely impacted, both through delays and through increased costs. Any of these developments, and others, could have a material adverse effect on the Company's business and results of operations and could delay its plans for development of the Pebble Project.

Risk of Secure Title or Property Interest.

There can be no certainty that title to any property interest acquired by the Company or any of its subsidiaries is without defects. Although the Company has taken reasonable precautions to ensure that legal title to its properties is properly documented, there can be no assurance that its property interests may not be challenged or impugned. Such property interests may be subject to prior unregistered agreements or transfers or other land claims, and title may be affected by undetected defects and adverse laws and regulations.

The Pebble Partnership's mineral concessions at Pebble are located on State of Alaska lands specifically designated for mineral exploration and development. Alaska is a stable jurisdiction with a well-developed regulatory and legal framework for resource development and public lands management, a strong commitment to the rule of law and lengthy track record for encouraging investment in the development of its land and natural resources.

The Pebble Project is Subject to Political and Environmental Regulatory Opposition.

The Pebble Project faces concerted opposition from certain individuals and organizations who are motivated to preclude any possible mining in the Bristol Bay Watershed (the "BBW"). The BBW is an important wildlife and salmon habitat area. Accordingly, one of the greatest risks to the Pebble Project is seen to be political/permitting risk, which may ultimately preclude construction of a mine at the Pebble Project. Opposition may include legal challenges to exploration and development permits, which may delay or halt development. Other tactics may, and have been, employed by opposition groups to delay or frustrate development at Pebble, including political and public advocacy, electoral strategies, media and public outreach campaigns, attempting to purchase intervening land rights, and protest activity. These efforts could materially increase the cost and time for development of the Pebble Project and the related infrastructure, or require changes to development plans, which could adversely impact project economics.

The Pebble Partnership's Mineral Property Interests Do Not Contain Any Mineral Reserves or Any Known Body of Economic Mineralization.

Although there are known bodies of mineralization on the Pebble Project, and the Pebble Partnership has completed core drilling programs within, and adjacent to, the deposits to determine measured and indicated resources, there are currently no known reserves or body of commercially viable ore. Accordingly, the Pebble Project must be considered an exploration prospect only. Extensive additional work is required before Northern Dynasty or the Pebble Partnership can ascertain if any mineralization may be economic and hence constitute "ore".

The current mine plan that is included in the Project Description for the development of the Pebble Project is supported by a preliminary economic assessment but is not supported by any preliminary or final feasibility study. Accordingly, even if permitting is achieved, there is a substantial risk that the Company will not be able

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

to proceed with the development of the Pebble Project, that the Pebble Project may not be proven to be economically mineable and shareholders may not be able to recover their investment in the Company. See discussion above under "*The Current Mine Plan for the Pebble Project in the 2021 PEA is Not Supported by Any Preliminary or Final Feasibility Study.*"

Mineral Resources Disclosed by Northern Dynasty or the Pebble Partnership for the Pebble Project are Estimates Only.

Northern Dynasty has included mineral resource estimates that have been made in accordance with 43-101. These resource estimates are classified as "measured resources", "indicated resources" and "inferred resources". Northern Dynasty advises United States investors that although the SEC now recognizes estimates of "measured mineral resources", "indicated mineral resources" and "inferred mineral resources", there is no assurance any mineral resources that Northern Dynasty may report as "measured mineral resources", "indicated mineral resources" and "inferred mineral resources" under 43-101 would be the same had Northern Dynasty prepared the resource estimates under the standards adopted under the SEC Modernization Rules. Further, "inferred resources" have a great amount of uncertainty as to their economic and legal feasibility. Under Canadian securities law, estimates of "inferred mineral resources" cannot form the basis of feasibility or prefeasibility studies, or any economic study except a Preliminary Economic Assessment as prescribed under NI 43-101.

All amounts of mineral resources are estimates only, and Northern Dynasty cannot be certain that any specified level of recovery of metals from the mineralized material will in fact be realized or that the Pebble Project or any other identified mineral deposit will ever qualify as a commercially mineable (or viable) ore body that can be economically exploited. Mineralized material, which is not mineral reserves, does not have demonstrated economic viability. In addition, the quantity of mineral reserves and mineral resources may vary depending on, among other things, metal prices and actual results of mining. There can be no assurance that any future economic or technical assessments undertaken by the Company with respect to the Pebble Project will demonstrate positive economics or feasibility.

The mineral resource estimates contained herein have not been adjusted for any risk that the required environmental permits may not be obtained for the Pebble Project. The risk associated with the ability of the Pebble Project to obtain required environmental permits is a risk to the reasonable prospects for eventual economic extraction of the mineralisation and their definition as a mineral resource.

There Is No Assurance That Northern Dynasty Will Be Able To Partner The Pebble Project.

One of Northern Dynasty's business objectives is to enter into a joint venture or other partnership arrangement with a third-party partner to fund the advancement of the development of the Pebble Project. There is no assurance that Northern Dynasty will be able to enter into an arrangement with a partner for the development of the Pebble Project, and the negative impact of the ROD and the investigations regarding the Pebble Project may negatively impact the Company's ability to enter into any arrangement. To the extent that Northern Dynasty does not enter into any agreement to partner the Pebble Project, it will continue to be required to fund all exploration and other related expenses for advancement of the Pebble Project, of which there is no assurance.

Negative Operating Cash Flow.

The Company currently has a negative operating cash flow and anticipates that it will continue to do so for the foreseeable future. Accordingly, the Company will require substantial additional capital in order to fund its future exploration and development activities. The Company does not have any arrangements in place for this additional funding and there is no assurance that such funding will be achieved when required. Any failure to obtain additional financing or failure to achieve profitability and positive operating cash flows will have a material adverse effect on its financial condition and results of operations.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

Northern Dynasty Has No History of Earnings and No Foreseeable Earnings, and May Never Achieve Profitability or Pay Dividends.

Northern Dynasty has only had losses since inception and there can be no assurance that Northern Dynasty will ever be profitable. Northern Dynasty has never declared or paid any dividends on its common shares. Northern Dynasty intends, for the foreseeable future, to retain its future earnings, if any, to finance its exploration activities and its operations. Northern Dynasty presently has no ability to generate earnings from its mineral properties as its mineral properties are in the pre-development stage.

Northern Dynasty's Condensed Consolidated Interim Financial Statements have been Prepared Assuming Northern Dynasty will continue on a Going Concern Basis.

Northern Dynasty has prepared its 2021 Financial Statements on the basis that Northern Dynasty will continue as a going concern. At March 31, 2022, the Company had working capital of \$17.3 million. Northern Dynasty has prioritized the allocation of its financial resources to meet key corporate and Pebble Project expenditure requirements in the near term, including the funding of the appeal of the ROD. Additional financing will be required to progress any material expenditures at the Pebble Project and for working capital. Northern Dynasty's continuing operations and the underlying value and recoverability of the amounts shown for mineral property interest are entirely dependent upon the existence of economically recoverable mineral reserves at the Pebble Project, the ability of the Company to finance its operating costs, the completion of the exploration and development of the Pebble Project, the Pebble Partnership obtaining the necessary permits to mine, and on future profitable production at the Pebble Project. Furthermore, failure to continue as a going concern would require that Northern Dynasty's assets and liabilities be restated on a liquidation basis, which would likely differ significantly from their going concern assumption carrying values. Refer also to discussion in [1.6 Liquidity](#).

Northern Dynasty has a History of Negative Cash Flow from Operations Which Is Anticipated to Continue for the Foreseeable Future.

Northern Dynasty experiences negative cash flow from operations and anticipates incurring negative cash flow from operations for 2022 and beyond as a result of the fact that it does not have revenues from mining or any other activities. In addition, as a result of Northern Dynasty's business plans for the development of the Pebble Project, Northern Dynasty expects cash flow from operations to continue to be negative until revenues from production at the Pebble Project begin to offset operating expenditures, of which there is no assurance. Accordingly, Northern Dynasty's cash flow from operations will be negative for the foreseeable future as a result of expenses to be incurred in connection with advancement of the Pebble Project.

As the Pebble Project is Northern Dynasty's only Mineral Property Interest, any Failure to establish that the Pebble Project Possesses Commercially Viable and Legally Mineable Deposits of Ore may cause a Significant Decline in the Trading Price of Northern Dynasty's Common Shares and reduce its ability to obtain New Financing.

The Pebble Project is, through the Pebble Partnership, Northern Dynasty's only mineral project. Northern Dynasty's principal business objective is to carry out further exploration and related activities to establish whether the Pebble Project possesses commercially viable deposits of ore. If Northern Dynasty is not successful in its plan of operations, Northern Dynasty may have to seek a new mineral property to explore or acquire an interest in a new mineral property or project. Northern Dynasty anticipates that such an outcome would adversely impact the price of Northern Dynasty's common shares. Furthermore, Northern Dynasty anticipates that its ability to raise additional financing to fund exploration of a new property or the acquisition of a new property or project would be impaired as a result of the failure to establish commercial viability of the Pebble Project.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

If Prices for Copper, Gold, Molybdenum, Silver and Rhenium Decline, Northern Dynasty May Not Be Able To Raise the Additional Financing Required To Fund Expenditures for the Pebble Project.

The ability of Northern Dynasty to raise financing to fund the Pebble Project will be significantly affected by changes in the market price of the metals for which it explores. The prices of copper, gold, molybdenum, silver and rhenium are volatile, and are affected by numerous factors beyond Northern Dynasty's control. The level of interest rates, the rate of inflation, the world supplies of and demands for copper, gold, molybdenum, silver and rhenium and the stability of exchange rates can all cause fluctuations in these prices. Such external economic factors are influenced by changes in international investment patterns and monetary systems and political developments. The prices of copper, gold, molybdenum, silver and rhenium have fluctuated in recent years, and future significant price declines could cause investors to be unprepared to finance exploration of copper, gold, molybdenum, silver and rhenium, with the result that Northern Dynasty may not have sufficient financing with which to fund its activities related to the advancement of the Pebble Project.

The Russian-Ukrainian Conflict – Potential Effects Which Could Detrimentally Affect the Global Economy, Peace and Stability in Europe and Beyond, and Our Business and Share Price

In February 2022, Russian military forces invaded Ukraine. In response, Ukrainian military personnel and civilians are actively resisting the invasion. Many countries throughout the world have provided aid to the Ukraine in the form of financial aid and in some cases military equipment and weapons to assist in their resistance to the Russian invasion. The North Atlantic Treaty Organization ("NATO") has also mobilized forces to NATO member countries that are close to the conflict as deterrence to further Russian aggression in the region. The outcome of the conflict is uncertain and is likely to have wide-ranging consequences on the peace and stability of the region and the world economy. In addition, certain countries including Canada and the United States, have imposed strict financial and trade sanctions against Russia, which sanctions may have far reaching effects on the global economy. The long-term impacts of the conflict and the sanctions imposed on Russia remain uncertain and could have an adverse impact on the Company's business and results of operations and may have wide-ranging consequences on the peace and stability of the region and the world economy.

The conflict could affect the economies and securities markets of countries in ways that cannot necessarily be foreseen at the present time. These events could also exacerbate other pre-existing political, social and economic risks. Such events could also cause substantial market volatility, exchange trading suspensions and closures and affect the Company's performance, the price of its securities and its ability to successfully raise capital at reasonable rates or at all. As a result, the market price of the Common Shares may decline even if the Company's operating results, underlying asset values or prospects have not changed.

Although we do not have employees, suppliers or business activities in Ukraine or Russia at this time, the conflict may have a detrimental impact on our business and operations at some point in the future if the conflict spreads, escalates or affects Europe or the world more broadly.

Mining is Inherently Dangerous and Subject to Conditions or Events beyond the Company's Control, which could have a Material Adverse Effect on the Company's Business.

Hazards such as fire, explosion, floods, structural collapses, industrial accidents, unusual or unexpected geological conditions, ground control problems, power outages, inclement weather, seismic activity, cave-ins and mechanical equipment failure are inherent risks in the Company's exploration, development and mining operations. These and other hazards may cause injuries or death to employees, contractors or other persons at the Company's mineral properties, severe damage to and destruction of the Company's property, plant and equipment and mineral properties, and contamination of, or damage to, the environment, and may result in the suspension of the Company's exploration and development activities and any future production activities. Safety measures implemented by the Company may not be successful in preventing or mitigating future accidents.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

Northern Dynasty Competes with Larger, Better Capitalized Competitors in the Mining Industry.

The mining industry is competitive in all of its phases, including financing, technical resources, personnel and property acquisition. It requires significant capital, technical resources, personnel and operational experience to effectively compete in the mining industry. Because of the high costs associated with exploration, the expertise required to analyze a project's potential and the capital required to develop a mine, larger companies with significant resources may have a competitive advantage over Northern Dynasty. Northern Dynasty faces strong competition from other mining companies, some with greater financial resources, operational experience and technical capabilities than Northern Dynasty possesses. As a result of this competition, Northern Dynasty may be unable to maintain or acquire financing, personnel, technical resources or attractive mining properties on terms Northern Dynasty considers acceptable or at all.

Compliance with Environmental Requirements will take Considerable Resources and Changes to these Requirements could Significantly Increase the Costs of Developing the Pebble Project and Could Delay These Activities.

Northern Dynasty and the Pebble Partnership must comply with stringent environmental legislation in carrying out work on the Pebble Project. Environmental legislation is evolving in a manner that will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. Changes in environmental legislation could increase the cost to the Pebble Partnership of carrying out its exploration and, if warranted, development of the Pebble Project. Further, compliance with new or additional environmental legislation may result in delays to the exploration and, if warranted, development activities.

Changes in Government Regulations or the Application thereof and the Presence of Unknown Environmental Hazards on Northern Dynasty's Mineral Properties May Result in Significant Unanticipated Compliance and Reclamation Costs.

Government regulations relating to mineral rights tenure, permission to disturb areas and the right to operate can adversely affect Northern Dynasty. Northern Dynasty and the Pebble Partnership may not be able to obtain all necessary licenses and permits that may be required to carry out exploration at the Pebble Project. Obtaining the necessary governmental permits is a complex, time-consuming and costly process. The duration and success of efforts to obtain permits are contingent upon many variables not within the Company's control. Obtaining environmental permits may increase costs and cause delays depending on the nature of the activity to be permitted and the interpretation of applicable requirements implemented by the permitting authority. There can be no assurance that all necessary approvals and permits will be obtained and, if obtained, that the costs involved will not exceed those that the Company previously estimated. It is possible that the costs and delays associated with the compliance with such standards and regulations could become such that the Company would not proceed with the development or operation of a mine at the Pebble Project.

Litigation.

The Company is, and may in future be, subject to legal proceedings, including with regard to actions discussed in [1.2.2. Legal Matters](#) in the pursuit of its Pebble Project. Given the uncertain nature of these actions, the Company cannot reasonably predict the outcome thereof. If the Company is unable to resolve these matters favorably, it will likely have a material adverse effect of the Company.

Northern Dynasty is Subject to Many Risks that are Not Insurable and, as a Result, Northern Dynasty will Not Be Able to Recover Losses through Insurance Should Such Certain Events Occur.

Hazards such as unusual or unexpected geological formations and other conditions are involved in mineral exploration and development. Northern Dynasty may become subject to liability for pollution, cave-ins or hazards against which it cannot insure. The payment of such liabilities could result in an increase in Northern

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

Dynasty's operating expenses, which could, in turn, have a material adverse effect on Northern Dynasty's financial position and its results of operations. Although Northern Dynasty and the Pebble Partnership maintain liability insurance in an amount which they consider adequate, the nature of these risks is such that the liabilities might exceed policy limits, the liabilities and hazards might not be insurable against, or Northern Dynasty and the Pebble Partnership might elect not to insure against such liabilities due to high premium costs or other reasons, in which event Northern Dynasty could incur significant liabilities and costs that could materially increase Northern Dynasty's operating expenses.

If Northern Dynasty Loses the Services of the Key Personnel that it Engages to Undertake its Activities, then Northern Dynasty's Plan of Operations May Be Delayed or be More Expensive to Undertake than Anticipated.

Northern Dynasty's success depends to a significant extent on the performance and continued service of certain contractors, including HDSI (refer [1.9 Transactions with Related Parties](#)). The Company has access to the full resources of HDSI, an experienced exploration and development firm with in-house geologists, engineers and environmental specialists, to assist in its technical review of the Pebble Project. There can be no assurance that the services of all necessary key personnel will be available when required or, if obtained, that the costs involved will not exceed those previously estimated. It is possible that the costs and delays associated with the loss of services of key personnel could become such that the Company would not proceed with the development or operation of a mine at the Pebble Project.

The Volatility of Northern Dynasty's Common Shares Can Expose Northern Dynasty to the Risk of Litigation.

Northern Dynasty's common shares are listed on the TSX and NYSE American. Securities of mining companies have experienced substantial volatility in the past, often based on factors unrelated to the financial performance or prospects of the companies involved (see previous risk). These factors include macroeconomic developments in North America and globally, currency fluctuations and market perceptions of the attractiveness of particular industries. The price of Northern Dynasty's common shares is also likely to be significantly affected by short-term changes in copper, gold, molybdenum, silver and rhenium prices or in Northern Dynasty's financial condition or results of operations as reflected in quarterly earnings reports.

As a result of any of these factors, the market price of Northern Dynasty's common shares at any given point in time may not accurately reflect their long-term value. Securities class action litigation often has been brought against companies following periods of volatility in the market price of their securities. Northern Dynasty is, and may in the future be the target of similar litigation. Securities litigation could result in substantial costs and damages and divert management's attention and resources.

Northern Dynasty Will Require Additional Funding to Meet the Development Objectives of the Pebble Project.

Northern Dynasty will need to raise additional financing (through share issuances, debt or asset level partnering) to achieve permitting and development of the Pebble Project. In addition, a positive production decision at the Pebble Project would require significant capital for project engineering and construction. Accordingly, the continuing permitting and development of the Pebble Project will depend upon Northern Dynasty's ability to obtain financing through debt financing, equity financing, the joint venturing of the project or other means. There can be no assurance that Northern Dynasty will be successful in obtaining the required financing, or that it will be able to raise the funds on terms that do not result in high levels of dilution to shareholders. If we are unable to raise the necessary capital resources, we may at some point have to reduce or curtail our operations, which would have a material adverse effect on our ability to pursue the permitting and development of the Pebble Project.

1.15.6 Qualified Persons

Stephen Hodgson, P.Eng, and David Gaunt, P.Geo., qualified persons who are not independent of Northern Dynasty, have reviewed and approved the scientific and technical information associated with the 2021 PEA that is contained in this MD&A.

Northern Dynasty Minerals Ltd.
Management's Discussion And Analysis
Three months ended March 31, 2022

1.15.7 U.S. Securities Matters

The Company is a "foreign issuer" under the U.S. Exchange Act and entitled to file continuous disclosure reports with the SEC under the Multi-Jurisdictional Disclosure System ("**MJDS**") between Canada and the United States, and to provide disclosure on our mineral properties, including the Pebble project, in accordance with NI 43-101 disclosure standards and CIM Definition Standards. For this reason, information contained in this MD&A in respect of the Pebble project may not be comparable to similar information made public by United States companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder.
